

Subject card

| Subject name and code | Mechanics of Solids and Fluids II, PG_00039796 | | | | | | | | |
|---|---|---------------------------------------|---|--|----------|---|---|----------|--|
| Field of study | Materials Engineering, Materials Engineering, Materials Engineering, Materials Engineering | | | | | | | | |
| Date of commencement of studies | October 2020 | | Academic year of realisation of subject | | | 2021/2022 | | | |
| Education level | first-cycle studies | | Subject group | | | Obligatory subject group in the field of study | | | |
| | | | | | | Subject group related to scientific research in the field of study | | | |
| Mode of study | Full-time studies | | Mode of delivery | | | at the university | | | |
| Year of study | 2 | | Language of instruction | | | Polish | | | |
| Semester of study | 4 | | ECTS credits | | | 4.0 | | | |
| Learning profile | general academic profile | | Assessment form | | | exam | | | |
| Conducting unit | Institute of Mechanics | s and Machine | Design -> Facu | ulty of Mechani | ical Eng | ineerin | g and Ship Te | chnology | |
| Name and surname | Subject supervisor dr hab. inż. Krzysztof Lipiński | | | | | | | | |
| of lecturer (lecturers) | Teachers | | dr inż. Piotr Patrosz | | | | | | |
| | | | dr hab. inż. Krzysztof Lipiński | | | | | | |
| | | | dr inż. Marzena Banaszek | | | | | | |
| Lesson types and methods | Lesson type | Lecture | Tutorial | Laboratory | Projec | :t | Seminar | SUM | |
| of instruction | Number of study hours | 30.0 | 15.0 | 0.0 | 0.0 | | 0.0 | 45 | |
| | E-learning hours included: 0.0 | | | | | | | | |
| | Adresy na platformie eNauczanie: Mechanika ciała Stałego i Płynów II, C, IM, sem.02, letni 21/22 (PG_00039796) - Moodle ID: 22483 https://enauczanie.pg.edu.pl/moodle/course/view.php?id=22483 | | | | | | | | |
| Learning activity and number of study hours | Learning activity | Participation in classes include plan | | Participation i consultation h | | Self-st | tudy | SUM | |
| | Number of study hours | 45 5.0 | | 5.0 | 50 | | | 100 | |
| Subject objectives | Acquainting the students with basic principles of kinematics, as well as basic principles of dynamics of particle, dynamics of solid body and mechanics of fluid. Forming of abilities in solving of practical problems, in issues of dynamics of particle, solid body and fluid mechanics. | | | | | | | | |
| Learning outcomes | Course outcome | | Subject outcome | | | Method of verification | | | |
| | K6_U06 | | Is able to integrate elements of information obtained, interpret these fragments and the whole task, as well as draw conclusions and formulate and justify opinions | | | [SU4] Assessment of ability to use methods and tools [SU1] Assessment of task fulfilment | | | |
| | K6_W05 | | | Student has read, understood and he can explain phenomena of rigid body dynamics processes and fluid mechanics using language of mathematics and tools of computer supports, He/she can in particular recreate yourself basic theorems and laws understands the need to improve competence in the field of solid and fluid mechanics; is aware of its own limitations and knows when and with what to ask the experts, is able to properly define priorities for the implementation of self or other people | | | [SW1] Assessment of factual knowledge [SK5] Assessment of ability to solve problems that arise in practice | | |

| Prerequisites and co-requisites and co-requisites and co-requisites Laws of physics and the mathematics on level of school of average, in this particularly: geometry and trigonometry, differential calculus, vectorial and matrix calculus, the statics and the kinematics of point. Assessment methods and criteria Subject passing criteria Passing threshold Percentage of the final grade Written exam 56.0% Subject passing criteria Passing threshold Percentage of the final grade Written exam 56.0% Midterm colloquiums 56.0% Subject passing criteria Wittbrodt E., Sawiak S.: Mechanika ogólna. Teoria i zadania. Wyd. PG, Gdańsk, 2012 Puzyrewski R., Sawicki A.: Podstawy mechaniki płynów i hydrauliki. PWN, Warszawa, 1998 Supplementary literature Leyko J. Mec hanika ogólna, t. 1 i 2, PWN, Warszawa, 2004 Grybo's R.: Podstawy mechaniki płynów, tom I, PWN Warszawa 1998 Burka E.S., Nalęcz T.J.: Mechanika płynów w przykładach, PWN Warszawa 1999 Ciałkowski M.: Mechanika płynów zbiór zadań z rozwiązaniami, Wydawnictwo Politechniki Poznańskiej 2008 Tesch K.: Mechanika płynów, Wyd. Politechniki Gdańskiej 2008 Percentining of positions of the centres of mass and the mass moments of inertia of rigid bodies. The dynamic analysis of the point mass and stiff bodies, determining of the dynamic reactions at bearings of rotors, with use of the differential equations of rigid body motion as well as the other principles of dynamic. What alexement Not alexement | Subject contents | LECTURES Repetition of the main principles of kinematics. Dynamics: The principal terms of dynamics of material point. The special cases of the dynamic equations of motion. The principles of dynamics. Work of a force. Power of a forces. The work-energy principle. Potential. The principle of conservation of mechanical energy. Alternative forms of the work-energy principle. Dynamics of systems of material points. The work of forces that act on systems of material points. The principla terms of dynamics of rigid body. The mass geometry of rigid bodies: mass moments of inertia. Steiner principle. Differential equations of dynamics of translational, rotational and planar motions of rigid body. The momentum of momentum and kinetic energy of a rigid body in translational, rotational and planar motion. Vibrations of mechanical systems. Introduction, basic concepts and definitions of fluid mechanics, Static of fluids - The hydrostatic pressure. Swimming of bodies; Kinematics of fluids - Principle of mass conservation; Fluid Dynamics - The principle of conservation of momentum. Navier-Stokes equations; The principle of conservation of energy. Bernoullis equation; Criteria of flows similarities; Laminar and turbulent flows. Basic theory of the boundary layers; Flows in closed channels; aerofoil aerodynamics; Cavitations. Physical basis, hydrodynamic effects. EXERCISES: The kinematics of material point and rigid body. Developments and solutions of dynamic equations of motion of material point. d"Alembert principle. The principle of momentum and the impulse as well as the principle the moment of momentum. Use of principle of work-energy as well as the principle of conservation of energy. Calculation of moments of inertia for rigid bodies. Use of the dynamic equations of motion for translational, rotational and planar motion of rigid body. The use of d"Alemberts principle, reactions of bearings. Vibrations of mechanical systems. Determination of hydrostatic forces on submerged bodies. Application for solving flows in channel | | | | | | | |
