

Subject card

Subject name and code	Nonmetali Materials, PG_00043718						
Field of study	Transport and Logistics, Transport and Logistics						
Date of commencement of studies	October 2020		Academic year of realisation of subject		2020/2021		
Education level	first-cycle studies		Subject group				
Mode of study	Full-time studies		Mode of delivery		at the university		
Year of study	1		Language of instruction		Polish		
Semester of study	1		ECTS credits		1.0		
Learning profile	general academic profile		Assessment form		assessment		
Conducting unit	Department of Theory and Ship Design -> Faculty of Mechanical Engineering and Ship Technology						
Name and surname of lecturer (lecturers)	Subject supervisor		dr hab. inż. Lech Rowiński				
	Teachers		dr hab. inż. Lech Rowiński				
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	15.0	0.0	0.0	0.0	0.0	15
	E-learning hours included: 0.0						
	Adresy na platformie eNauczanie: Materiały niemetalowe Transport i Logistyka - Moodle ID: 7529 https://enauczanie.pg.edu.pl/moodle/course/view.php?id=7529						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	15		2.0		8.0	25
Subject objectives	Provide knowledge with the basic knowledge regarding organic synthetic materials (plastics) that are utilized in machine and boat building as well as principles of selection of materials for structures, glues and surface coats supplemented with information regarding procurement of products.						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	[K6_W03] has a basic knowledge on hydromechanics, thermodynamics, machine construction, ecology, materials science and electronics necessary to understand the construction and operation principles of means of marine transport		The student knows principal plastics. The student knows basic data of synthetic materials. The student is able to describe the properties of synthetic materials; He knows basic technological processes He knows basic technological processes and its influence on the usable properties of synthetic materials, he distinguishes main composites categories. He knows the basic types resins and reinforcing materials used in boat building and reinforcing materials. The student knows the principles of creating polymer composites		[SW1] Assessment of factual knowledge		
	[K6_U05] can formulate a simple engineering task and its specification within the range of design, construction and operation of means and systems of transport		Student is able to select plastic material for typical technical product basing on technical specification and technological properties or indicate properties of products manufactured of considered material		[SU2] Assessment of ability to analyse information		

Subject contents	Basic definitions and nomenclature (monomers and polymers); Review of non-metallic materials - natural and synthetic (cellulose, proteins, natural caoutchouc); Material characteristics for different application areas; Thermoplastics and elastomers. Mechanical and thermal properties of thermoplastics. Procurement of products using thermoplastics. Duromers and their chemistry. Resins and reinforcements for marine application. Technological process of reinforced structures. Technological process of a large structural element of reinforced synthetic resin.		
Prerequisites and co-requisites	Basic chemistry. Basic mechanical properties of materials		
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	Short test during every lesson	60.0%	100.0%
