

Subject card

Subject name and code	Technology of production and manufacturing of Means of Transport, PG_00045234						
Field of study	Transport and Logistics, Transport and Logistics						
Date of commencement of studies	October 2020	Academic year of realisation of subject				2022/2023	
Education level	first-cycle studies	Subject group					
Mode of study	Full-time studies	Mode of delivery				at the university	
Year of study	3	Language of instruction				Polish	
Semester of study	5	ECTS credits				2.0	
Learning profile	general academic profile	Assessment form				assessment	
Conducting unit	Department of Ship Manufacturing Technology, Quality Systems and Materials Science -> Faculty of Mechanical Engineering and Ship Technology						
Name and surname of lecturer (lecturers)	Subject supervisor		dr inż. Karol Niklas				
	Teachers		dr inż. Karol Niklas				
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	30.0	0.0	0.0	0.0	0.0	30
	E-learning hours included: 0.0						
	Technologia budowy i wytwarzania środków transportu, W, STW, sem.05, zima 22/23 - Moodle ID: 27134 https://enauczanie.pg.edu.pl/moodle/course/view.php?id=27134 Technologia budowy i wytwarzania środków transportu, W, STW, sem.05, zimowy 22/23 - Moodle ID: 27599 https://enauczanie.pg.edu.pl/moodle/course/view.php?id=27599						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours	Self-study	SUM		
	Number of study hours	30	3.0	17.0	50		
Subject objectives	The student learns the basics of the technology of construction, manufacturing and repair of means of transport (mainly seagoing ships)						
Learning outcomes	Course outcome		Subject outcome			Method of verification	
	[K6_W05] has an organized knowledge on design, construction and operation of means and systems of transport		The student identifies the main methods of building and repairing ships. Can describe the basic shipbuilding processes and equipment for ship building and repair.			[SW1] Assessment of factual knowledge	
	[K6_W08] has knowledge regarding the principles of sustainable development		The student knows and understands how the technological processes of building and repairing a ship affect the environment			[SW1] Assessment of factual knowledge	
	[K6_W06] has an organized knowledge on engineering methods and design tools allowing the conducting of projects within the construction and operation of means and systems of transport		The student has basic knowledge in the field of shipbuilding and repair. He can use it to supervise the construction of a ship and its renovation in a shipyard			[SW1] Assessment of factual knowledge	
Subject contents	Lecture: General characteristics of the technological process of building a ship and basic methods of assembling ship hulls. Diagram of the ship manufacturing process. The student recognizes and describes the basic types of shipyards, methods of material processing, recognizes the main processes of shipbuilding and repair. Identifies, classifies and characterizes basic steel materials used in shipbuilding. Describes technological equipment used in pre-treatment processes: describes the processes of prefabrication and assembly during ship construction and the ship launching process. Become familiar with the basic issues related to the maintenance of the technical condition of the ship (repairs)						
Prerequisites and co-requisites							
Assessment methods and criteria	Subject passing criteria		Passing threshold		Percentage of the final grade		
	kolokwium końcowe		60.0%		100.0%
