

Subject card

Subject name and code	Safety and Reliability of Transport Systems, PG_00045263						
Field of study	Transport and Logistics, Transport and Logistics						
Date of commencement of studies	October 2020		Academic year of realisation of subject			2022/2023	
Education level	first-cycle studies		Subject group				
Mode of study	Full-time studies		Mode of delivery			at the university	
Year of study	3		Language of instruction			Polish	
Semester of study	6		ECTS credits			2.0	
Learning profile	general academic profile		Assessment form			assessment	
Conducting unit	Faculty of Ocean Engineering and Ship Technology						
Name and surname of lecturer (lecturers)	Subject supervisor		dr inż. Roman Liberacki				
	Teachers		dr inż. Roman Liberacki				
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	15.0	15.0	0.0	0.0	0.0	30
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	30		2.0		18.0	50
Subject objectives	To acquaint students with hazards in transport and methods of reliability and risk assessment.						
Learning outcomes	Course outcome		Subject outcome			Method of verification	
	[K6_W05] has an organized knowledge on design, construction and operation of means and systems of transport		The student describes the basic definitions connected with the discipline: safety and reliability of transport systems. The student explains the models used to assess the reliability of components and systems.			[SW1] Assessment of factual knowledge	
	[K6_W06] has an organized knowledge on engineering methods and design tools allowing the conducting of projects within the construction and operation of means and systems of transport		The student knows the methods used in designing of vehicles for the required level of reliability.			[SW1] Assessment of factual knowledge	
	[K6_W07] has a general knowledge on humanities, social and economical sciences. Knows the rules of creating the forms of personal entrepreneurship and economic activity, has knowledge on the protection of intellectual property rights and industrial property rights and copyrights		The student knows the relationship between the level of reliability and economic effects of transport activities.			[SW1] Assessment of factual knowledge	
Subject contents	The qualification of reliability, reliability coefficients, mathematical models of valuations of the units and systems reliability. The human factor. Method of the valuation of the probability of the human mistakes. Typical hazards occurring in transport. The definition of risk, the measure of the risk, mathematical models of risk valuations. The criterion ALARP. The method FSA (Formal Safety Assessment) in navigation. Reliability in supply chains.						
Prerequisites and co-requisites	Basic knowledge of the probability theory.						
Assessment methods and criteria	Subject passing criteria		Passing threshold			Percentage of the final grade	
	Written test		50.0%			100.0%

ISM CODE 8. SPIS CODE
	Supplementary literature	1. Modarres M., What every engineer should know about Reliability and Risk Analysis, Center for Reliability Engineering, University of Maryland, College Park, Maryland, Marcel Dekker, Inc., New York, Basel, Hong Kong, 1993.
	eResources addresses	Adresy na platformie eNauczanie: Bezpieczeństwo i niezawodność w systemach transportowych, W, C, sem.6, letni 22/23 (PG_00041690 i PG_00045263) - Moodle ID: 29551 https://enauczanie.pg.edu.pl/moodle/course/view.php?id=29551
Example issues/ example questions/ tasks being completed	1. Describe the hazards in the water transport. 2. Explain the ALARP class risk criterion. 3. List the steps of the FSA method.	
Work placement	Not applicable
