

SDAŃSK UNIVERSITY 的 OF TECHNOLOGY

Subject card

Subject name and code	Fluid Mechanics, PG_00044047								
Field of study	Ocean Engineering, Ocean Engineering								
Date of commencement of studies	October 2020		Academic year of realisation of subject		2021/2022				
Education level	first-cycle studies		Subject group						
Mode of study	Full-time studies		Mode of delivery		at the university				
Year of study	2		Language of instruction		Polish				
Semester of study	3		ECTS credits		2.0				
Learning profile	general academic profile		Assessment form		assessment				
Conducting unit	Institute of Ocean Engineering and Ship Technology -> Faculty of Mechanical Engineering and Ship Technology						d Ship		
Name and surname	Subject supervisor	dr inż. Michał Krężelewski							
of lecturer (lecturers)	Teachers		dr inż. Michał Krężelewski						
			dr hab. inż. Paweł Flaszyński						
		mgr inż. Olga Kazimierska							
Lesson types and methods	Lesson type	Lecture	Tutorial	Laboratory	Projec	t	Seminar	SUM	
of instruction	Number of study hours	15.0	15.0	0.0	0.0		0.0	30	
	E-learning hours included: 0.0								
	Adresy na platformie eNauczanie:								
Learning activity and number of study hours	Learning activity	Participation in classes includ plan		Participation in consultation hours		Self-study		SUM	
	Number of study hours	30		2.0		13.0		45	
Subject objectives	 o familiarize students with the basic concepts and laws of fluid mechanics, such as: density, viscosity, compressibility, surface tension, Static equilibrium equations of fluid, hydrostatic pressure, fluid forces on straight surfaces, etc. Continuity equation, The principle of momentum conservation, Calculation of hydrodynamic forces, The principle of conservation of energy for non-viscous fluid, incompressible flow (Bernoulli eq.) Basic issues of viscous liquid flow, determination of losses in the flow. The concept of the stress tensor in a real (viscous) fluid. 								
Learning outcomes	Course outcome		Subject outcome		Method of verification				
	[K6_W02] has a basic knowledge in physics, including technical mechanics, fluid mechanics, solid- state physics, optics and acoustics necessary to understand basic physical phenomena occurring in ocean technology		Student formulates basic flow problems and solves them based on the laws and methods of fluid mechanics. Applies the laws and methods of fluid mechanics in design and for the purpose of understanding physical phenomena occurring in ocean engineering.		[SW3] Assessment of knowledge contained in written work and projects				
	[K6_U02] can work individually and in a team, communicate through various techniques in professional environment and also record, analyse, and present the results of work, can estimate the time needed to complete a given task		The student is able to solve simple tasks in the field of fluid mechanics (fluid statics, 1D flows of perfect and real liquid). He can estimate the time and resources to solve the task		[SU1] Assessment of task fulfilment				

	O serve of the						
Subject contents	Scope of the course:						
	The main properties of fluids: - The density, viscosity, compressibility, surface tension,						
	Basic concepts:						
	- Particle fluid						
	- The pressure, shear stress,						
	- Pascal's law. Fluid statics:						
	- The hydrostatic equilibrium equations of fluid						
	- The hydrostatic pressure formula,						
	- Pressure force to the flat surface						
	The concept of the center of pressure force,						
	 - Calculation of the moment of pressure force. - Buoyancy, center of buoyancy. 						
	- Stability of floating bodies (ships)						
	Metacentric radius,						
	Metacentric height,						
	Equilibrium conditions. The main issues of fluid kinematics:	~ c .					
	- A description of the motion of fluids						
	- Eulerian method,						
	Lagrangian method						
	- Determination of position, velocity and acceleration of the fluid,						
	- The concept of the path of the fluid particles (pathline), streamline, streamsurface, streamtube The principle of conservation of mass (continuity equation):						
	 The concept of the mass flow rate the volumetric flow rate, The concept of control surface, control volume 						
	- Calculation of the flow velocity at varying cross channel						
	The principle of conservation of energy for perfect fluid, incompressible flow (Bernoulli's equation):						
	- Solving one-dimensional flow problems in channels: determination of the flow rate and pressure.						
	The principle of conservation of momentum, - The concept of a volume of liquid,						
	- Guiding principles of conservation of momentum in the form of integral,						
	- Calculation of hydrodynamic forces,						
	The concept of the stress tensor in a						
	Basic issues of the real fluid flow, de - Generalized Bernoulli equation,	etermination of loss in the flow:					
	- Determining the amount of local lo	ss and linear :					
	Laminar flow						
	Transitional flow, Turbulent flow.						
Prerequisites and co-requisites	Knowledge of the basic concepts of - Force (force vector) - Torque, - The arm of force,	physics / mechanics:					
	 Force (force vector) Torque, The arm of force, What is the pressure (?) Momentum, potential energy, kinet 	ic energy,					
	 Force (force vector) Torque, The arm of force, What is the pressure (?) Momentum, potential energy, kinet Knowledge of units related to above 	ic energy, e concepts,					
	 Force (force vector) Torque, The arm of force, What is the pressure (?) Momentum, potential energy, kinet Knowledge of units related to abov Knowledge of the basic concepts of 	ic energy, e concepts,					
	 Force (force vector) Torque, The arm of force, What is the pressure (?) Momentum, potential energy, kinel Knowledge of units related to abov Knowledge of the basic concepts of Definite integral, Derivative of the function, 	ic energy, e concepts, calculus / calculus					
	 Force (force vector) Torque, The arm of force, What is the pressure (?) Momentum, potential energy, kinel Knowledge of units related to abov Knowledge of the basic concepts of Definite integral, Derivative of the function, Basic ability to apply integrals in pro- 	ic energy, e concepts, calculus / calculus oblems of physics					
	 Force (force vector) Torque, The arm of force, What is the pressure (?) Momentum, potential energy, kinel Knowledge of units related to above Knowledge of the basic concepts of Definite integral, Derivative of the function, Basic ability to apply integrals in pr Ordinary differential equations with 	ic energy, e concepts, calculus / calculus oblems of physics separated variables					
	 Force (force vector) Torque, The arm of force, What is the pressure (?) Momentum, potential energy, kinel Knowledge of units related to abov Knowledge of the basic concepts of Definite integral, Derivative of the function, Basic ability to apply integrals in pro- 	ic energy, e concepts, calculus / calculus oblems of physics separated variables					
	 Force (force vector) Torque, The arm of force, What is the pressure (?) Momentum, potential energy, kinet Knowledge of units related to abov Knowledge of the basic concepts of Definite integral, Derivative of the function, Basic ability to apply integrals in pr Ordinary differential equations with The surface integral, volume integral Knowledge of algebra: 	ic energy, e concepts, calculus / calculus oblems of physics separated variables al					
	 Force (force vector) Torque, The arm of force, What is the pressure (?) Momentum, potential energy, kinet Knowledge of units related to abov Knowledge of the basic concepts of Definite integral, Derivative of the function, Basic ability to apply integrals in pr Ordinary differential equations with The surface integral, volume integral Knowledge of algebra: The transformation of algebraic ext 	ic energy, e concepts, calculus / calculus oblems of physics separated variables al					
	 Force (force vector) Torque, The arm of force, What is the pressure (?) Momentum, potential energy, kinet Knowledge of units related to abov Knowledge of the basic concepts of Definite integral, Derivative of the function, Basic ability to apply integrals in pr Ordinary differential equations with The surface integral, volume integral Knowledge of algebra: 	ic energy, e concepts, calculus / calculus oblems of physics separated variables al					
	 Force (force vector) Torque, The arm of force, What is the pressure (?) Momentum, potential energy, kinel Knowledge of units related to abov Knowledge of the basic concepts of Definite integral, Derivative of the function, Basic ability to apply integrals in pr Ordinary differential equations with The surface integral, volume integral Knowledge of algebra: The transformation of algebraic ex The ability to "take before the pare 	ic energy, e concepts, calculus / calculus oblems of physics separated variables al					
	 Force (force vector) Torque, The arm of force, What is the pressure (?) Momentum, potential energy, kinel Knowledge of units related to abov Knowledge of the basic concepts of Definite integral, Derivative of the function, Basic ability to apply integrals in pr Ordinary differential equations with The surface integral, volume integral Knowledge of algebra: The transformation of algebraic ex The ability to "take before the pare Algebra of vectors: The scalar product, 	ic energy, e concepts, calculus / calculus oblems of physics separated variables al					
	 Force (force vector) Torque, The arm of force, What is the pressure (?) Momentum, potential energy, kinet Knowledge of units related to abov Knowledge of the basic concepts of Definite integral, Derivative of the function, Basic ability to apply integrals in pr Ordinary differential equations with The surface integral, volume integri Knowledge of algebra: The transformation of algebraic ex The ability to "take before the pare Algebra of vectors: The scalar product, Vector product, 	ic energy, e concepts, calculus / calculus oblems of physics separated variables al					
	 Force (force vector) Torque, The arm of force, What is the pressure (?) Momentum, potential energy, kinet Knowledge of units related to abov Knowledge of the basic concepts of Definite integral, Derivative of the function, Basic ability to apply integrals in pr Ordinary differential equations with The surface integral, volume integri Knowledge of algebra: The transformation of algebraic ex The ability to "take before the pare Algebra of vectors: The scalar product, Vector product, Vector component, 	ic energy, e concepts, calculus / calculus oblems of physics separated variables al pressions, nthesis" (!!!)					
	 Force (force vector) Torque, The arm of force, What is the pressure (?) Momentum, potential energy, kinet Knowledge of units related to abov Knowledge of the basic concepts of Definite integral, Derivative of the function, Basic ability to apply integrals in pr Ordinary differential equations with The surface integral, volume integri Knowledge of algebra: The transformation of algebraic ex The ability to "take before the pare Algebra of vectors: The scalar product, Vector product, 	ic energy, e concepts, calculus / calculus oblems of physics separated variables al pressions, nthesis" (!!!)					
	 Force (force vector) Torque, The arm of force, What is the pressure (?) Momentum, potential energy, kinet Knowledge of units related to abov Knowledge of the basic concepts of Definite integral, Derivative of the function, Basic ability to apply integrals in pr Ordinary differential equations with The surface integral, volume integral Knowledge of algebra: The transformation of algebraic ex The ability to "take before the pare Algebra of vectors: The scalar product, Vector product, Vector component, The projection of the vector on the Knowledge of trigonometric function Sine, cosine, tangent, cotangent Basic knowledge of stereometry (3E Eg.: calculating the volume of a cy 	ic energy, e concepts, calculus / calculus oblems of physics separated variables al pressions, nthesis" (!!!) direction of the specified unit vector s					
	 Force (force vector) Torque, The arm of force, What is the pressure (?) Momentum, potential energy, kinet Knowledge of units related to abov Knowledge of the basic concepts of Definite integral, Derivative of the function, Basic ability to apply integrals in pr Ordinary differential equations with The surface integral, volume integril Knowledge of algebra: The transformation of algebraic ex The ability to "take before the pare Algebra of vectors: The scalar product, Vector component, The projection of the vector on the Knowledge of trigonometric function Sine, cosine, tangent, cotangent 	ic energy, e concepts, calculus / calculus oblems of physics separated variables al pressions, nthesis" (!!!) direction of the specified unit vector s					
	 Force (force vector) Torque, The arm of force, What is the pressure (?) Momentum, potential energy, kinet Knowledge of units related to abov Knowledge of the basic concepts of Definite integral, Derivative of the function, Basic ability to apply integrals in pr Ordinary differential equations with The surface integral, volume integral Knowledge of algebra: The transformation of algebraic ex The scalar product, Vector product, Vector component, The projection of the vector on the Knowledge of trigonometric function Sine, cosine, tangent, cotangent Basic knowledge of stereometry (3E Eg .: calculating the volume of a cy Eg .: calculating the area of the cyle 	ic energy, e concepts, calculus / calculus oblems of physics separated variables al pressions, nthesis" (!!!) direction of the specified unit vector s geometry) linder, cuboid, and the like. inder					
	 Force (force vector) Torque, The arm of force, What is the pressure (?) Momentum, potential energy, kinet Knowledge of units related to abov Knowledge of the basic concepts of Definite integral, Derivative of the function, Basic ability to apply integrals in pr Ordinary differential equations with The surface integral, volume integral Knowledge of algebra: The transformation of algebraic ex The ability to "take before the pare Algebra of vectors: The scalar product, Vector product, Vector component, The projection of the vector on the Knowledge of trigonometric function Sine, cosine, tangent, cotangent Basic knowledge of stereometry (3E Eg.: calculating the volume of a cy 	ic energy, e concepts, calculus / calculus oblems of physics separated variables al pressions, nthesis" (!!!) direction of the specified unit vector s geometry) linder, cuboid, and the like. inder					
	 Force (force vector) Torque, The arm of force, What is the pressure (?) Momentum, potential energy, kinet Knowledge of units related to abov Knowledge of the basic concepts of Definite integral, Derivative of the function, Basic ability to apply integrals in pr Ordinary differential equations with The surface integral, volume integral Knowledge of algebra: The transformation of algebraic ex The ability to "take before the pare Algebra of vectors: The scalar product, Vector component, The projection of the vector on the Knowledge of stereometry (3E Eg .: calculating the area of the cyl Knowledge of floating point notation 	ic energy, e concepts, calculus / calculus oblems of physics separated variables al pressions, nthesis" (!!!) direction of the specified unit vector s geometry) linder, cuboid, and the like. inder	Percentage of the final grade				
and co-requisites	 Force (force vector) Torque, The arm of force, What is the pressure (?) Momentum, potential energy, kinet Knowledge of units related to abov Knowledge of the basic concepts of Definite integral, Derivative of the function, Basic ability to apply integrals in pr Ordinary differential equations with The surface integral, volume integral Knowledge of algebra: The transformation of algebraic ex The ability to "take before the pare Algebra of vectors: The scalar product, Vector product, Vector component, The projection of the vector on the Knowledge of trigonometric function Sine, cosine, tangent, cotangent Basic knowledge of stereometry (3E Eg .: calculating the volume of a cy Eg .: calculating the area of the cylix 	ic energy, e concepts, calculus / calculus oblems of physics separated variables al pressions, nthesis" (!!!) direction of the specified unit vector s geometry) finder, cuboid, and the like. inder , eg .: * 10 ^ 6
