	[K6_U02] can perform tasks related to the field of study in an innovative way as well as solve complex and nontypical problems, applying knowledge of physics, in changing and not fully predictable conditions		Student obtains knowledge of the physics course, especially nuclear physics. The student acquires the ability to analyze the phenomena occurring with the participation of ionizing radiation. The student is able to use simple physical models in relation to more complex systems.		[SU1] Assessment of task fulfilment		
[K6_U05] can plan and conduct experiments related to the field of study, including computer simulations and measurements; interpret obtained results and draw conclusions		The student gains the ability to conduct experiments with the use of radioactive isotopes. Can correctly present measurement data and assess measurement uncertainties. Can correctly interpret the results and draw conclusions.		[SU1] Assessment of task fulfilment
