

Subject card

Subject name and code	Fundamentals of Designing of Ships, PG_00044038						
Field of study	Ocean Engineering, Ocean Engineering						
Date of commencement of studies	October 2020	Academic year of realisation of subject			2021/2022		
Education level	first-cycle studies	Subject group			Obligatory subject group in the field of study Subject group related to scientific research in the field of study		
Mode of study	Part-time studies	Mode of delivery			at the university		
Year of study	2	Language of instruction			Polish		
Semester of study	3	ECTS credits			3.0		
Learning profile	general academic profile	Assessment form			assessment		
Conducting unit	Department of Theory and Ship Design -> Faculty of Mechanical Engineering and Ship Technology						
Name and surname of lecturer (lecturers)	Subject supervisor		dr inż. Cezary Żrodowski				
	Teachers		dr inż. Cezary Żrodowski				
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	20.0	0.0	0.0	0.0	0.0	20
	E-learning hours included: 0.0						
	Adresy na platformie eNauczanie: Podstawy projektowania okrętu 2021 - Moodle ID: 20438 https://enauczanie.pg.edu.pl/moodle/course/view.php?id=20438						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	20		3.0		54.0	77
Subject objectives	Introduction to ship design theory, presentation of ship design process, basic tools and professional vocabulary.						
Learning outcomes	Course outcome		Subject outcome			Method of verification	
	[K6_W05] has an organized knowledge on design, construction and operation of ocean technology objects and systems		The student knows and carries out the course the ship design process, described by Evans' spiral and her younger derivatives.			[SW1] Assessment of factual knowledge	
	[K6_U04] has self-education skills in order to improve professional qualifications, is ready to work in industrial environment, adheres to HSE rules and regulations		The student is able to find and analyze the regulations of classification societies and international conventions in the context of the project.			[SU1] Assessment of task fulfilment	
Subject contents	History of ship design methods. Mathematical modelling, problem idealization and algorithm development for design process. Tools for improvement of design process. Design spiral. Stages of parametric and geometric design. Professional language. Rules for design calculations: measurement units, mathematical models, presentation and explanation of calculation results. Physical phenomena, theoretical and empirical design relationships. Functional and safety criteria. Buoyancy equation. Calculation of main design parameters on example of general cargo ship. Compartmentalization. Calculation of buoyancy, stability and register tonnage.						
Prerequisites and co-requisites							
Assessment methods and criteria	Subject passing criteria		Passing threshold			Percentage of the final grade	
	Project		60.0%			50.0%	
	Lecture exam		100.0%			50.0%
