

## Subject card

Subject name and code	Study visits - description and interpretation of space , PG_00049162							
Field of study	Spatial Development							
Date of commencement of studies	October 2021	Academic year of realisation of subject			2021/2022			
Education level	first-cycle studies	Subject group			Optional subject group			
Mode of study	Full-time studies	Mode of delivery			at the university			
Year of study	1	Language of instruction			Polish			
Semester of study	2	ECTS credits			1.0			
Learning profile	general academic profile	Assessment form			assessment			
Conducting unit	Department of Urban Design and Regional Planning -> Faculty of Architecture							
Name and surname of lecturer (lecturers)	Subject supervisor	dr inż. arch. Magdalena Rembeza						
	Teachers	dr inż. arch. Magdalena Rembeza						
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM	
	Number of study hours	0.0	0.0	0.0	0.0	0.0	0	
	E-learning hours included: 0.0							
	Adresy na platformie eNauczenie:							
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours		Self-study		SUM	
	Number of study hours	0	0.0		25.0		25	
Subject objectives	The aim of the course is to prepare an urban inventory of the selected urban area of the city. Students will learn about the methods and techniques in urban inventory planning practice as well as they will be better prepared for practical design.							
Learning outcomes	Course outcome	Subject outcome			Method of verification			
	[K6_U01] has the ability to abstractly understand technical problems; applies basic mathematical and simulation methods in urban planning and spatial planning	a student is able to use familiar methods and techniques of urban inventory in planning practice			[SU1] Assessment of task fulfilment			
Subject contents	This practice is a form of outdoor classes that main aim is to familiarize students with the principles of conducting an urban inventory . This inventory is the basis for urban studies and projects in the field of town and country planning. Students work in groups of 2-6 persons and the size of the group depends on the size of the urban area. The students during the five day practice: - Collect data in the area using a card of urban inventory - Perform photographic documentation - Perform sketches from nature - Develop, under the direction of teacher, material according to the legend on a unified graphical record.							
Prerequisites and co-requisites								
Assessment methods and criteria	Subject passing criteria	Passing threshold			Percentage of the final grade			
	compatibility with an urban inventory card	70.0%			20.0%			
	substantive value of the task	70.0%			80.0%			
Recommended reading	Basic literature	1. Łapińska H.: Inventory of land - introduction to methods of preparation, Architecture, Scientific Papers 18, Białystok, 1999 2. Technical Guidelines for G-3.4. Inventory of urban complexes and bands of green and architectural objects GUIGK, Warsaw, 1981. 3. Chmielewski J. M. „Teoria urbanistyki w projektowaniu i planowaniu miast”, Oficyna Wydawnicza Politechniki Warszawskiej, Warszawa, 2001						
	Supplementary literature	1. Regulation of the Minister of Infrastructure dated 26 August 2003 on the scope of the project required zoning plan (Journal of Laws No. 164, item 11344).						

	eResources addresses	
Example issues/ example questions/ tasks being completed	<p>1. For the selected part of the urban fabric please calculate the urban indicators:</p> <ul style="list-style-type: none"> <li>- built- intensity</li> <li>- the percentage of an area biologically active.</li> </ul> <p>2. What elements make up the study of architecture and urban interior of the selected part of the city?</p>	
Work placement	Not applicable
