GDAŃSK UNIVERSITY OF TECHNOLOGY

Subject card

Subject name and code	ENTERPRISE INFORMATION SYSTEMS, PG_00050167
Field of study	Economic Analytics

Date of commencement of studies	October 2021	Academic year of realisation of subject	2022/2023
Education level	first-cycle studies	Subject group	Obligatory subject group in the field of study
			Subject group related to scientific research in the field of study
Mode of study	Full-time studies	Mode of delivery	at the university
Year of study	2	Language of instruction	English Lectures are conducted in English, materials are available in English and Polish, activities and exams are in both languages (student's choice), and laboratory is conducted in Polish.
Semester of study	4	ECTS credits	5.0
Learning profile	general academic profile	Assessment form	exam
Conducting unit	Department of Informatics in Management -> Faculty of Management and Economics		
Name and surname of lecturer (lecturers)	Subject supervisor	dr Tomasz Janowski	
	Teachers	dr Tomasz Janowski	
		dr inż. Radosław Drozd	

Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	30.0	0.0	30.0	0.0	0.0	60
	E-learning hours included: 0.0						
	Additional information: https://enauczanie.pg.edu.pl/moodle/course/view.php?id=22625						

Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours	Self-study	SUM
	Number of study hours	60	10.0	55.0	125

Subject objectives	The aim of the course is introduction to the modern practice of the use of information systems by enterprisesfor achieving operational excellence, developing new products and services, improving decision-making, andgaining competitive advantage. Another goal is to answer the question how the use of information systemsand technologies transforms a traditional enterprise into a modern digital enterprise, and what is the impactof such transformation on the socioeconomic environment.

Learning outcomes	Course outcome	Subject outcome	Method of verification
	[K6_K01] Understands the need for continuous learning, improving professional, personal and social competences.	Students understand the evolving nature of technology-enabled organizations and the importance of continued learning to keep abreast with the changes.	[SK2] Assessment of progress of work [SK5] Assessment of ability to solve problems that arise in practice
	[K6_W09] Knows the ways and tools of acquiring and collecting data, including IT data, used in the analysis and explanation of socio-economic phenomena and processes.	Students are able to classify and describe information technology environments used to build information systems and know the concepts and practice of IT project management.	[SW2] Assessment of knowledge contained in presentation [SW1] Assessment of factual knowledge
	[K6_U12] Can work in a team, including project, managerial and executive roles.	Team execution of the lab tasks.	[SU1] Assessment of task fulfilment

Subject contents	LECTURES
	LECTURE 1 - INTRODUCTION
	• Introductory case
	• How does digitalization transform modern enterprises?
	• What are the strategic goals of enterprise information systems?
	• What is an information system, what are its functions and components?
	• How does the information system realize value for the enterprise?
	• What disciplines study information systems and what do each of them bring?
	• What are the main messages of this lecture?
	LECTURE 2 - TYPOLOGY
	• Introductory case
	• How are business processes related to information systems?
	• How are information systems serving management groups in an enterprise?
	• How do information systems join and improve the effectiveness of an enterprise?
	• How do information systems support cooperation and social business?
	• What is the role of information systems function in an enterprise?
	• What are the main messages of this lecture?
	LECTURE 3 - ORGANIZATION
	• Introductory case
	• How does organization influence the creation and use of information systems?
	• How do information systems affect the operation of the organization?
	• What strategies help to compete relying on information systems?
	• How do information systems help produce value for an organization?
	• What are the challenges facing information systems and how to solve them?
	• What are the main messages of this lecture?
	LECTURE 4 - SOCIETY
	• Introductory case
	• What are the ethical, social and political problems related to information systems?
	• What rules of conduct can be used to guide ethical decisions?
	• What challenges does contemporary technology create for individual privacy?
	• What challenges does contemporary technology create for intellectual property?
	• How do information systems affect individual rights and obligations?
	• What are the main messages of this lecture?
	LECTURE 5 - ECONOMY
	• Introductory case
	• What are the main characteristics of digital commerce?
	• What are the digital commerce business and revenue models?
	• How does digital commerce transform marketing and transactions?
	• What is the role and applications of mobile commerce in business?
	• What problems should be solved when building digital commerce?
	• What are the main messages of this lecture?
	LABORATORY

	• Laboratory 1 Fundamentals of the SAP system, Global Bike company in SAP • Laboratory 2 Sales and distribution process in SAP • Laboratory 3 Materials management process in SAP • Laboratory 4 Production planning and implementation process in SAP • Laboratory 5 Accounting and financial process in SAP • Laboratory 6 Control process in SAP • Laboratory 7 Human resources management process in SAP • Laboratory 8 Colloquium
Prerequisites and co-requisites	Fundamentals of computer science, management, marketing, production management and microeconomics

Assessment methods and criteria

Subject passing criteria	Passing threshold	Percentage of the final grade
Project	0.0%	20.0%
Exam	60.0%	45.0%
Activity	0.0%	10.0%
Colloquium	60.0%	25.0%
