

Subject card

Subject name and code	Databases, PG_00037174						
Field of study	Economic Analytics						
Date of commencement of studies	October 2021	Academic year of realisation of subject			2022/2023		
Education level	first-cycle studies	Subject group			Obligatory subject group in the field of study Subject group related to scientific research in the field of study		
Mode of study	Part-time studies	Mode of delivery			at the university		
Year of study	2	Language of instruction			Polish		
Semester of study	3	ECTS credits			4.0		
Learning profile	general academic profile	Assessment form			assessment		
Conducting unit	Department of Informatics in Management -> Faculty of Management and Economics						
Name and surname of lecturer (lecturers)	Subject supervisor	dr inż. Anna Trzaskowska					
	Teachers	dr inż. Anna Trzaskowska					
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	8.0	0.0	16.0	0.0	0.0	24
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	24		8.0		68.0	100
Subject objectives	Understanding the basic theoretical and practical principles for creating databases.  Acquainting with the database environment on the example of MS Access.						

Learning outcomes	Course outcome	Subject outcome	Method of verification
	[K6_W09] Knows the ways and tools of acquiring and collecting data, including IT data, used in the analysis and explanation of socio-economic phenomena and processes.	The student knows the methods and tools of obtaining and collecting data to determine the requirements and design an IT system which is a database.	[SW1] Assessment of factual knowledge [SW2] Assessment of knowledge contained in presentation [SW3] Assessment of knowledge contained in written work and projects
	[K6_U08] Has the ability to use mathematical and IT tools to analyse economic phenomena and make decisions by economic entities.	The student learns the DBMS environment and database management methods.	[SU1] Assessment of task fulfilment [SU2] Assessment of ability to analyse information [SU3] Assessment of ability to use knowledge gained from the subject [SU4] Assessment of ability to use methods and tools [SU5] Assessment of ability to present the results of task
	[K6_K03] Can assess the importance of criteria and tasks in the projects implemented.	The student can implement a database based on defined requirements.	[SK3] Assessment of ability to organize work [SK4] Assessment of communication skills, including language correctness [SK5] Assessment of ability to solve problems that arise in practice [SK1] Assessment of group work skills [SK2] Assessment of progress of work
Subject contents	<p>LECTURES: The essence, types of databases. Elements of database construction. Data models and data integrity. Database management systems - DBMS.</p> <p>LABORATORIES: Getting to know MS Access - creating tables, relations, queries (selecting and functional), creating forms and reports. Designing databases as elements of management information systems in the enterprise.</p>		
Prerequisites and co-requisites	Knowledge of the MS Office environment.		
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	Final test - quiz	60.0%	25.0%
	Practical exercise	60.0%	35.0%
	Project	60.0%	40.0%
Recommended reading	Basic literature	<p>1. Michael J. Hernandez - Projektowanie baz danych dla każdego. Przewodnik krok po kroku. Helion, Gliwice 2022.</p> <p>2. Michael Alexander, Richard Kusleika - Microsoft Access 2019 PL Biblia. Kompletny Przewodnik. Helion, Gliwice 2019.</p>	
	Supplementary literature	Own materials for classes.	
	eResources addresses	<p>Adresy na platformie eNauczanie:</p> <p>Bazy Danych NSTAC 2022/2023 - Moodle ID: 25805  <a href="https://enauczanie.pg.edu.pl/moodle/course/view.php?id=25805">https://enauczanie.pg.edu.pl/moodle/course/view.php?id=25805</a></p>	
Example issues/ example questions/ tasks being completed	Create relationships between tables using primary keys. Show the differences between the update query and the crosstab query. What do we use forms for and what do we use reports in Access? Export the report to a pdf file. Design a database for a sample enterprise based on the collected requirements, taking into account the identified constraints.		
Work placement	Not applicable		

Document generated electronically. Does not require a seal or signature.
