

Subject card

Subject name and code	Financial and Insurance Mathematics, PG_00037187						
Field of study	Economic Analytics						
Date of commencement of studies	October 2021	Academic year of realisation of subject			2021/2022		
Education level	first-cycle studies	Subject group			Obligatory subject group in the field of study Subject group related to scientific research in the field of study		
Mode of study	Part-time studies	Mode of delivery			at the university		
Year of study	1	Language of instruction			Polish		
Semester of study	2	ECTS credits			3.0		
Learning profile	general academic profile	Assessment form			exam		
Conducting unit	Department of Economic Analysis and Finance -> Faculty of Management and Economics						
Name and surname of lecturer (lecturers)	Subject supervisor		dr hab. inż. Krystian Zawadzki				
	Teachers		dr hab. inż. Krystian Zawadzki				
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	8.0	16.0	0.0	0.0	0.0	24
	E-learning hours included: 0.0						
Adresy na platformie eNauczanie:							
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	24		6.0		45.0	75
Subject objectives	Introducing students to the basic mathematical concepts and tools used in finance, banking and insurance.						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	[K6_W01] Has a basic knowledge of the nature of economic sciences and their place in the system of social sciences and relations to other areas of science.		Student knows the valuation methods of the time value of money and their importance in the economy..		[SW1] Assessment of factual knowledge		
	[K6_U08] Has the ability to use mathematical and IT tools to analyse economic phenomena and make decisions by economic entities.		Student uses a learned mathematical tools to analyze financial events in banking and insurance.		[SU4] Assessment of ability to use methods and tools		

Subject contents	<p>LECTURES: Time value of money – introduction; Simple interest, discount rate, compound interest, continuous compounding; Inflation rate and real rate of interest; Valuation of short-term securities; Annuities; Payments varying in arithmetic and geometric progression; Repayment of debts analysis'; Valuation of long-term securities; Fundamentals of actuarial mathematics; Using a spreadsheet in financial mathematics.</p> <p>TUTORIALS: Simple interest, discount rate, compound interest, continuous compounding; Nominal, equivalent, effective and average rate of interest; Inflation rate and real rate of interest; Valuation of short-term securities (bonds and other securities); Annuity – immediate and annuity – due ; Perpetuities; Annuities payable more and less frequently than interest is convertible; Payments varying in arithmetic and geometric progression; Repayment of debts analysis'; Valuation of long-term securities; Introduction to the valuation of derivative instruments; Life expectancy tables; The average time of life; Annuities and life insurance.</p>		
Prerequisites and co-requisites			
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	Midterm colloquium	60.0%	80.0%
	Final Exam	60.0%	20.0%
