

Subject card

Subject name and code	Production Management, PG_00040525						
Field of study	Engineering Management						
Date of commencement of studies	October 2021	Academic year of realisation of subject				2022/2023	
Education level	first-cycle studies	Subject group				Obligatory subject group in the field of study Subject group related to scientific research in the field of study	
Mode of study	Part-time studies	Mode of delivery				at the university	
Year of study	2	Language of instruction				Polish	
Semester of study	3	ECTS credits				4.0	
Learning profile	general academic profile	Assessment form				exam	
Conducting unit	Faculty of Management and Economics						
Name and surname of lecturer (lecturers)	Subject supervisor		dr inż. Grzegorz Zieliński				
	Teachers		dr inż. Grzegorz Zieliński				
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	16.0	0.0	0.0	8.0	0.0	24
	E-learning hours included: 0.0						
Zarządzanie produkcją - zaoczne - sem III inż. ZIMA 2022/2023 - Moodle ID: 26826 https://enauczanie.pg.edu.pl/moodle/course/view.php?id=26826							
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	24		7.0		69.0	100
Subject objectives	The goal of the course is obtain by the students knowledge about contemporary operation systems of production and services. It gives the students skills in creation operation strategy and design operation systems.						
Learning outcomes	Course outcome		Subject outcome			Method of verification	
	[K6_W02] has a basic knowledge of the different types of departments in the organisation, with particular emphasis on structures of an engineering nature		Student defines and explains contemporary operation systems of production and services. Creates operation strategy. Applies fundamental methods and tools of design operation systems..			[SW1] Assessment of factual knowledge	
	[K6_U11] can plan and control production and production quality, including the identification and formulation of specifications for simple engineering tasks		Student is able to plan and control the production of selected products			[SU1] Assessment of task fulfilment	
	[K6_K02] identifies problems related to undertaking various tasks, including engineering in the changing conditions of the organisation's functioning; takes into account the ethical aspect related to the implementation of the organisation's tasks		Student identifies problems related to undertaking various tasks in the field of production management			[SK1] Assessment of group work skills	
	[K6_W08] has a basic knowledge of the changes taking place in the organisation and its environment, taking into account environmental problems		Student has basic knowledge about the changes taking place in the organization, including the inclusion of the ecological area in production			[SW1] Assessment of factual knowledge	
	[K6_W12] has a basic knowledge of production management and occupational safety and ergonomics management, as well as information technologies necessary for engineering management		Knows the Goals and Measures of Operations. Productivity. Operation Processes. Process Layout Planning. Process Reengineering and Improvement. Process Management.			[SW1] Assessment of factual knowledge	

Subject contents	LECTURES: <ol style="list-style-type: none"> 1. Introduction. Historical view. 2. Ability and production program. 3. Forms of production organization. 4. BOM and MRP. 5. System and production process. ABC analysis. 6. Supplies management. Production control and planning. 7. Industry 4.0. 8. Ecological aspects and industry 4.0 9. MRPII and ERP systems 			
Prerequisites and co-requisites				
Assessment methods and criteria	Subject passing criteria		Passing threshold	Percentage of the final grade
	Written exam		60.0%	50.0%
	Project and colloquium		60.0%	50.0%
Recommended reading	Basic literature		<ol style="list-style-type: none"> 1.
