

Subject card

Subject name and code	Production Management, PG_00037706						
Field of study	Management						
Date of commencement of studies	October 2021	Academic year of realisation of subject			2022/2023		
Education level	first-cycle studies	Subject group			Obligatory subject group in the field of study Subject group related to scientific research in the field of study		
Mode of study	Full-time studies	Mode of delivery			at the university		
Year of study	2	Language of instruction			English		
Semester of study	4	ECTS credits			4.0		
Learning profile	general academic profile	Assessment form			exam		
Conducting unit	Faculty of Management and Economics						
Name and surname of lecturer (lecturers)	Subject supervisor	dr Mateusz Muchlado					
	Teachers	dr Mateusz Muchlado dr inż. Ewa Marjańska					
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	15.0	30.0	0.0	0.0	0.0	45
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours		Self-study		SUM
	Number of study hours	45	8.0		47.0		100
Subject objectives	The aim of the training is to equip the student with basic knowledge of the internal and external supply chain management mechanisms and the ability to determine the critical path and the ability to optimize processes within the company in the field of production.						
Learning outcomes	Course outcome	Subject outcome			Method of verification		
	[K6_U06] predicts phenomena and processes in the organization, taking into account social aspects	Student is able to predict the production phenomena and processes taking into account the organisational and social aspects.			[SU4] Assessment of ability to use methods and tools [SU5] Assessment of ability to present the results of task		
	[K6_U09] uses theoretical knowledge to design solutions for managing the organization's resources	Student has an extended theoretical knowledge of designing and managing production projects in cooperation with an organisation.			[SU3] Assessment of ability to use knowledge gained from the subject [SU4] Assessment of ability to use methods and tools [SU5] Assessment of ability to present the results of task		
	[K6_W07] knows statistical and IT methods and tools that enable to obtain and present data on the organisation's resources	The student is able to identify the statistical and IT tools assisting production management in an enterprise.			[SW2] Assessment of knowledge contained in presentation [SW3] Assessment of knowledge contained in written work and projects		
	[K6_U10] uses the acquired knowledge to work in a team based on basic teamwork techniques	The acquired knowledge and skills will enable the students to achieve the predefined educational goals.			[SU3] Assessment of ability to use knowledge gained from the subject [SU4] Assessment of ability to use methods and tools [SU5] Assessment of ability to present the results of task		
[K6_W08] has a basic knowledge of the methods and tools used to conduct research related to particular areas of business activity	The knowledge allows the students to use the basic tools of lean manufacturing in the production management of an enterprise.			[SW2] Assessment of knowledge contained in presentation [SW3] Assessment of knowledge contained in written work and projects			

Subject contents	Lectures: Concept and development of production; supply chain management; production systems; analysis of production systems; supply logistics; production logistics; distribution logistics; production costs, robotization of production, industry 4.0.		
Prerequisites and co-requisites			
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	Group Work	60.0%	40.0%
	Exam	60.0%	60.0%
