GDAŃSK UNIVERSITY OF TECHNOLOGY

Subject card

Subject name and code	Essentials of Computer Science I, PG_00042612		
Field of study	Environmental Engineering		
Date of commencement of studies	October 2021	Academic year of realisation of subject	2022/2023
Education level	first-cycle studies	Subject group	Obligatory subject group in the field of study Subject group related to scientific research in the field of study
Mode of study	Part-time studies	Mode of delivery	at the university
Year of study	2	Language of instruction	Polish
Semester of study	3	ECTS credits	3.0
Learning profile	general academic profile	Assessment form	assessment
Conducting unit	Faculty of Civil and Environmental Engineering		
Name and surname of lecturer (lecturers)	Subject supervisor	dr inż. Wojciech Artichowicz	
	Teachers	dr inż. Wojciech Artichowicz	

Lesson types and methods of instruction

Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
Number of study hours	15.0	0.0	10.0	0.0	0.0	25

E-learning hours included: 0.0

Learning activity and number of study hours

Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours	Self-study	SUM
Number of study hours	25	4.0	50.0	79

Subject objectives

Acquaint the student with the principles of working with Office-type packages in order to prepare text documents, spreadsheets, multimedia presentations and databases. Introduction to basic numerical methods for solving nonlinear equations, systems of linear and nonlinear equations, interpolation and approximation methods, methods for numerical integration and elements of optimization .

Learning outcomes

Course outcome	Subject outcome	Method of verification
[K6_W15] knows and understands the methods of measuring basic quantities characteristic for fluid mechanics and hydraulics, hydrology; knows the calculation methods and IT tools necessary to analyze the results of laboratory and field work	The student is able to visualize and analyze the results of hydraulic and hydrological measurements.	[SW3] Assessment of knowledge contained in written work and projects
[K6_W06] has a structured and theoretically founded knowledge in the field of computer science, numerical methods and the possibilities of their applications for solving tasks, description of phenomena related to the flow of water in the environment, in open pipes and channels, filtration, migration of pollutants	Student has the knowledge about the basic numerical methods and has the ability to implement them in the spreadsheet.	[SW3] Assessment of knowledge contained in written work and projects
[K6_U11] can use selected computer programs to support design, including CAD graphics programs	The student is able to use the advanced capabilities of the office suite.	[SU2] Assessment of ability to analyse information [SU3] Assessment of ability to use knowledge gained from the subject [SU4] Assessment of ability to use methods and tools [SU5] Assessment of ability to present the results of task

Subject contents

LECTURE
Fundamentals of computer algebra systems. Rules for creating text documents. Basic concepts of typography. Creating text documents in a text editor. Creating equations in text editors. Basics of creating a presentation. Basics of vector graphics. Password security and data security.
