

## Subject card

Subject name and code	Facilities for wastewater treatment , PG_00048006						
Field of study	Environmental Engineering						
Date of commencement of studies	October 2021		Academic year of realisation of subject		2024/2025		
Education level	first-cycle studies		Subject group		Obligatory subject group in the field of study		
Mode of study	Part-time studies		Mode of delivery		at the university		
Year of study	4		Language of instruction		Polish		
Semester of study	7		ECTS credits		4.0		
Learning profile	general academic profile		Assessment form		exam		
Conducting unit	Department of Environmental Engineering Technology -> Faculty of Civil and Environmental Engineering						
Name and surname of lecturer (lecturers)	Subject supervisor		dr hab. inż. Krzysztof Czerwionka				
	Teachers		mgr inż. Anna Wilińska-Lisowska  dr hab. inż. Krzysztof Czerwionka				
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	15.0	5.0	0.0	10.0	0.0	30
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	30		5.0		80.0	115
Subject objectives	The aim of the course is to learn the principles of designing wastewater treatment plants						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	[K6_U03] can prepare documentation regarding the implementation of an engineering task/project and prepare a text or presentation including a discussion of the results of the implementation		The student is able to prepare a project of a municipal wastewater treatment plant		[SU1] Assessment of task fulfilment [SU3] Assessment of ability to use knowledge gained from the subject [SU4] Assessment of ability to use methods and tools		
	[K6_W03] has a structured and theoretically founded knowledge in the field of chemistry and biology, including knowledge necessary to understand the technological processes related to water treatment, wastewater treatment, waste management and sludge management		The student is able to choose the devices of the wastewater treatment plant depending on the required parameters of the quality of the treated wastewater		[SW3] Assessment of knowledge contained in written work and projects		
	[K6_W14] has a structured knowledge of current legal regulations regarding environmental protection, water and construction law; knows the basics of public procurement law, patent law, intellectual property protection and labor protection		The student is able to use legal regulations to design wastewater treatment plants.		[SW3] Assessment of knowledge contained in written work and projects		
	[K6_U10] can design basic equipment for water treatment, wastewater treatment and sludge and waste management		The student is able to design devices for a municipal wastewater treatment plant		[SU3] Assessment of ability to use knowledge gained from the subject [SU5] Assessment of ability to present the results of task		
Subject contents	Basic concepts, definitions, terminology. Legal requirements for wastewater treatment. The scope of the design of the wastewater treatment plant and its basic components. Raw wastewater balance. Flow resistance as the basis for the construction of the height scheme. Equipment for mechanical wastewater treatment - general characteristics of grates, sand traps and settling tanks. Facilities for biological wastewater treatment.						

Prerequisites and co-requisites	Knowledge of the processes used in water and wastewater technology		
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	project execution	60.0%	40.0%
	final exam	60.0%	60.0%
