

Subject card

Subject name and code	Intellectual Property Protection, PG_00048200						
Field of study	Civil Engineering						
Date of commencement of studies	October 2021		Academic year of realisation of subject		2024/2025		
Education level	first-cycle studies		Subject group		Obligatory subject group in the field of study Humanistic-social subject group		
Mode of study	Part-time studies		Mode of delivery		at the university		
Year of study	4		Language of instruction		Polish		
Semester of study	8		ECTS credits		1.0		
Learning profile	general academic profile		Assessment form		assessment		
Conducting unit	Faculty of Civil and Environmental Engineering						
Name and surname of lecturer (lecturers)	Subject supervisor		dr Elżbieta Walkiewicz				
	Teachers						
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	10.0	5.0	0.0	0.0	0.0	15
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	15		5.0		5.0	25
Subject objectives	Provide students with the basics of knowledge about intellectual property protection						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	[K6_U71] is able to apply knowledge from humanistic, social, economic or legal sciences in order to solve problems in a social environment		Is able, when formulating and solving life and professional situations, to notice and apply legal structures protecting intellectual property		[SU4] Assessment of ability to use methods and tools		
	[K6_W71] has general knowledge in humanistic, social, economic or legal sciences		He knows the basic concepts and principles of the humanities, including legal sciences, with particular emphasis on the protection of industrial property and copyright		[SW3] Assessment of knowledge contained in written work and projects		
	[K6_W06] knows the rules of constructing and dimensioning of building elements of: steel, reinforced concrete, wood, masonry.		Has general knowledge about building structures		[SW1] Assessment of factual knowledge		
	[K6_W07] has basic knowlede on natural processes (hydrological, hydraulic or geological) and its influence on building subsoil; understands specific aspects of surface and underground water, which constraints the design and exploitation of buildings and engineering objects		Has basic knowledge about natural processes		[SW1] Assessment of factual knowledge		
	[K6_W14] Has knowledge on basic enterprise, management and marketing in a company; knows labour norms in civil engineering and rules of construction organizing and management		Has basic knowledge about entrepreneurship		[SW1] Assessment of factual knowledge		

Subject contents	LECTURE Protection of creativity - historical outline. Intellectual property in legal doctrine. Industrial property law - general characteristics. Inventions, utility models, industrial designs - common provisions. Structure, organization and tasks of the Patent Office. Legal grounds for combating unfair competition. Acts of unfair competition.
