

Subject card

Subject name and code	Descriptive Geometry , PG_00043984						
Field of study	Civil Engineering						
Date of commencement of studies	October 2021		Academic year of realisation of subject		2021/2022		
Education level	first-cycle studies		Subject group		Obligatory subject group in the field of study		
Mode of study	Full-time studies		Mode of delivery		at the university		
Year of study	1		Language of instruction		Polish		
Semester of study	1		ECTS credits		4.0		
Learning profile	general academic profile		Assessment form		assessment		
Conducting unit	Katedra Wytrzymałości Materiałów -> Faculty of Civil and Environmental Engineering						
Name and surname of lecturer (lecturers)	Subject supervisor		dr inż. Bożena Kotarska-Lewandowska				
	Teachers		mgr inż. Tomasz Wiczenbach dr inż. Dawid Bruski dr inż. Angela Andrzejewska dr inż. Bożena Kotarska-Lewandowska prof. dr hab. inż. Jacek Chróścielewski dr inż. arch. Romanika Okraszewska dr inż. Karol Daszkiewicz				
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	15.0	15.0	0.0	15.0	0.0	45
	E-learning hours included: 0.0						
	Adresy na platformie eNauczanie:						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	45		5.0		50.0	100
Subject objectives	The aim of the course is to equip the student in: - knowledge of orthogonal, topographic and axonometric projections; - skills of solving spatial problems in engineering practice.						

Learning outcomes	Course outcome	Subject outcome	Method of verification
	[K6_U09] can read architectural, geodetical and construction drawings, is able to prepare engineering drawing using selected CAD software	At the conclusion of the course, students should be able to: • represent polyhedrons and selected surfaces in orthogonal, topographic and axonometric projection; • transform planes and rotate points around lines in orthogonal projection; • determine natural size e.g. development of polyhedron; • determine relation between objects in space by construction of piercing points or intersection lines; • solve practical problems in the scope of geometry of roofs and earth works; • sketch 3-D objects in axonometric view.	[SU1] Assessment of task fulfilment
	[K6_W02] knows the rules of descriptive geometry and technical drawing, which is needed to read and understand architecture, construction and geodesy plans and making them using CAD tools.	At the conclusion of the course, students should be able to: • read and create views or intersections of 3D objects in orthogonal projection, • read and create surfaces of earth works in topographic projection.	[SW3] Assessment of knowledge contained in written work and projects
Subject contents	Orthographic projection, planes of reference. Invariants of parallel projections. Representation of geometric elements in the Monge projection, transformation, auxiliary views. Belonging and parallelism of points, lines and planes. Determination of common elements: piercing points, edges between planes. Operating on polyhedrons: piercing points, intersection lines and development of polyhedrons surfaces. Parameters and construction of ellipse, parabola and hyperbola. Surfaces: sphere, conics and cylinder. Intersection of surfaces and planes, intersection of surfaces. Topographic projection. Representation of points, lines and planes. Basic constructions: belonging and parallelism of geometric elements, intersection of elements. Edge and normal view of a plane. Topographic surfaces. Determination of embankment and cut planes along roads and squares. Axonometric projection. Plane of reference and property of axonometric projection. Orthogonal projection. Determination of shortenings of true lengths on orthographic axes. Oblique axonometric projection. Application of presented projection methods: construction of roofs and earth work along roads. Basic rules of perspective projection, one-point perspective.		
Prerequisites and co-requisites	No requirements.		
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	Drawing exercises	0.0%	40.0%
	Project	0.0%	10.0%
	Test	40.0%	50.0%
