

Subject card

Subject name and code	Temporary steel structures, PG_00044206									
Field of study	Civil Engineering									
Date of commencement of studies	October 2021	Academic year of realisation of subject		2023/2024						
Education level	first-cycle studies		Subject group		Optional subject group Subject group related to scientific research in the field of study					
Mode of study	Full-time studies		Mode of delivery		at the university					
Year of study	3	Language of instruction		Polish						
Semester of study	6	ECTS credits		3.0						
Learning profile	general academic profile		Assessment form		assessment					
Conducting unit	Department of Metal Structures -> Faculty of Civil and Environmental Engineering									
Name and surname of lecturer (lecturers)	Subject supervisor		dr inż. Aleksander Perliński							
	Teachers									
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM			
	Number of study hours	0.0	15.0	0.0	30.0	0.0	45			
E-learning hours included: 0.0										
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM			
	Number of study hours	45	5.0		25.0	75				
Subject objectives	Preparation of the selected parts of the design documentation related to the simple steel canopy structure.									
Learning outcomes	Course outcome		Subject outcome		Method of verification					
	[K6_U06] can design steel, concrete (including reinforced), wood and masonry constructions and its elements		Can design simple steel canopy consisting of lightweight roof cladding, purlins, truss girders, hot-rolled columns, bracings and selected joints		[SU1] Assessment of task fulfilment [SU3] Assessment of ability to use knowledge gained from the subject [SU4] Assessment of ability to use methods and tools					
Subject contents	[K6_W06] knows the rules of constructing and dimensioning of building elements of: steel, reinforced concrete, wood, masonry.									
	Knows principles of simple steel members design like beams, truss girders, columns and bracings									
Prerequisites and co-requisites										
Assessment methods and criteria	Subject passing criteria		Passing threshold		Percentage of the final grade					
	Written tutorial test		60.0%		60.0%					
Design of a steel hall		60.0%		40.0%
