

关。GDAŃSK UNIVERSITY 创 OF TECHNOLOGY

Subject card

Subject name and code	DESIGN OF ROAD A	ND MOTORW	AYS, PG_000	44204				
Field of study	Civil Engineering							
Date of commencement of studies	October 2021		Academic year of realisation of subject			2023/2024		
Education level	first-cycle studies		Subject group			Optional subject group Subject group related to scientific research in the field of study		
Mode of study	Full-time studies		Mode of delivery			at the university		
Year of study	3		Language of instruction			Polish		
Semester of study	6		ECTS credits			2.0		
Learning profile	general academic profile		Assessment form		assessment			
Conducting unit	Department of Transportation Engineering -> Faculty of Civil and Environmental Engineering							
Name and surname of lecturer (lecturers)	Subject supervisor Teachers	dr inż. Marcin Stienss						
Lesson types and methods	Lesson type	Lecture	Tutorial Laboratory Project		t	Seminar	SUM	
of instruction	Number of study hours	0.0	15.0	0.0	15.0	.0 0.0		30
	E-learning hours included: 0.0							
Learning activity and number of study hours			Participation in consultation hours		Self-study		SUM	
	Number of study hours	30		5.0		15.0		50
Subject objectives	The course presents layout designed durin 1. Traffic assessme 2. Pavement design 3. Typical cross set 4. Earthworks calcu 5. Concept design 6. Concept design	ig previous ser ent, n ctions design, ulations, of a rural cross	nester. The sco road - in two ve	ope of work inc ersions,		on, wh	ich is based o	on the concept

Learning outcomes	Course outcome	Subject outcome	Method of verification				
	[K6_W03] knows the rules of preparing and circulation of geodetic documentation for realisation of investment; has knowledge about basics of geodetical service of road&construction investments; knows methods of plans projection as well as geodetical equipment and technology used in construction	After completing the course, the student should know the principles of proper preparation of geodetic data necessary to mark out a road in the field.	[SW3] Assessment of knowledge contained in written work and projects				
	[K6_U13] knows principles of constrution of roads and railroads; can design a section of a road and railroad; can evaluate the technical condition of a road and railroad infrastructure	After completing the course, the student should know the principles of proper horizontal and vertcal alignment and drainage design to minimize the negative impact on the environment.	[SU4] Assessment of ability to use methods and tools [SU3] Assessment of ability to use knowledge gained from the subject [SU2] Assessment of ability to analyse information [SU1] Assessment of task fulfilment				
	[K6_W09] knows the principles of determining of loads acting on basic constructions (e.g. general, industrial, bridge, water, marine, transport objects) and rules of its constructing	After completing the course, the student should know the rules for calculating the traffic load on road pavement.	[SW3] Assessment of knowledge contained in written work and projects				
	[K6_W10] Has basic knowledge on design, construction and maintenence of roads and railroads	After completing the course, the student should know the principles of designing the pavement, drainage, ditches, slopes, excavations and embankments.	[SW3] Assessment of knowledge contained in written work and projects				
	[K6_W15] Has knowlege of construction law and environmetal impact of investment realisation	After completing the project, the student should know the principles of designing and building a road in such a way that it has the lowest possible impact on the environment.	[SW3] Assessment of knowledge contained in written work and projects				
Subject contents	Exercise and project contents: design of a road section including pavement design, drainage system, earthworks and simple crossroad.						
Prerequisites and co-requisites	Prerequisites (basic): 1. Course - Descriptive Geometry (BSP007), 2. Course - Engineering Drawing (BSP008), 3. Course - Computer Aided Design (CAD) (BSP009), 4. Course - Construction and Building Materials (BSP014), 5. Course - Road and Motorway Construction I, II (BSP017), 6. Course - Soil Mechanics (BSP023), 7. Course - Bridge and Tunnels (BSP035).						
Assessment methods	Subject passing criteria	Passing threshold	Percentage of the final grade				
and criteria	Practical design exercise	100.0%	100.0%				
Recommended reading	Basic literature	 Basic literature: Krystek R. z zespołem: Węzły drogowe i autostradowe. WKŁ, Warszawa, 2008 Gaca S., Suchorzewski W., Tracz M.: Inżynieria Ruchu drogowego. Teoria i praktyka. WKŁ, Warszawa, 2009 Piłat J., Radziszewski P.: Nawierzchnie asfaltowe. WKŁ, Warszawa, 2004 Szydło A.: Nawierzchnie drogowe z betonu cementowego.
