

Subject card

Subject name and code	Steel Bridges, PG_00044278								
Field of study	Civil Engineering								
Date of commencement of studies	October 2021		Academic year of realisation of subject		2024/2025				
Education level	first-cycle studies		Subject group		Optional subject group				
Mode of study	Full-time studies		Mode of delivery		at the university				
Year of study	4		Language of instruction		Polish				
Semester of study	7		ECTS credits		4.0				
Learning profile	general academic profile		Assessment form		assessment				
Conducting unit	Department of Railway Engineering -> Faculty of Civil and Environmental Engineering								
Name and surname of lecturer (lecturers)	Subject supervisor		mgr inż. Maciej Malinowski						
	Teachers								
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM		
	Number of study hours	30.0	0.0	0.0	15.0	0.0	45		
E-learning hours included: 0.0									
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM		
	Number of study hours	45		5.0		50.0	100		
Subject objectives	<ul style="list-style-type: none">acquainted with basic principles of designing, shaping, calculation of bridge structures,acquainted with basin informations of building of bridges,acquainted with basic methods of diagnosis of bridges,								
Learning outcomes	Course outcome		Subject outcome			Method of verification			
	[K6_U07] Can design and properly dimension basic elements of construction or basic foundations of general, hydrotechnical and bridge constructions		Ability to design and dimension basic bridge elements						
[K6_W09] knows the principles of determining of loads acting on basic constructions (e.g. general, industrial, bridge, water, marine, transport objects) and rules of its constructing		Ability to determine bridge loads and the rules of their construction							

Subject contents	<p>Lecture:</p> <ul style="list-style-type: none"> ü Loads and interactions in bridge structures ü Small railroad bridges with an open road, basic knowledge, shaping, constructing, dimensioning, construction elements ü Small railway bridges with a closed carriageway, basic information, shaping, constructing, dimensioning, construction elements ü Composite bridges, basic knowledge, shaping, construction, dimensioning, construction elements ü Truss bridges, basic knowledge, shaping, construction, dimensioning, construction elements ü Arch bridges, basic information, shaping, constructing, dimensioning, construction elements ü Bridge construction technologies ü Elements of bridge facilities equipment ü Diagnostics of bridge structures - in situ tests, laboratory tests, load tests, monitoring <p>Designing:</p> <p>Project of a beam railway bridge with an open road</p>									
Prerequisites and co-requisites	<p>Strength of materials.</p> <p>Building mechanics.</p> <p>Basics of bridge engineering.</p>									
Assessment methods and criteria	<table border="1"> <thead> <tr> <th data-bbox="446 1327 806 1372">Subject passing criteria</th><th data-bbox="806 1327 1140 1372">Passing threshold</th><th data-bbox="1140 1327 1486 1372">Percentage of the final grade</th></tr> </thead> <tbody> <tr> <td data-bbox="446 1372 806 1405">Lecture</td><td data-bbox="806 1372 1140 1405">55.0%</td><td data-bbox="1140 1372 1486 1405">50.0%</td></tr> <tr> <td data-bbox="446 1405 806 1439">Projects</td><td data-bbox="806 1405 1140 1439">65.0%</td><td data-bbox="1140 1405 1486 1439">50.0%</td></tr> </tbody> </table>	Subject passing criteria	Passing threshold	Percentage of the final grade	Lecture	55.0%	50.0%	Projects	65.0%	50.0%
Subject passing criteria	Passing threshold	Percentage of the final grade								
Lecture	55.0%	50.0%								
Projects	65.0%	50.0%
