

## 。 GDAŃSK UNIVERSITY OF TECHNOLOGY

## Subject card

| Subject name and code                       | Thesis Seminar , PG_00044251   |  |   |                                     |        |  |         |     |
|---|--|--|---|-------------------------------------|--------|--|---------|-----|
| Field of study                              | Civil Engineering  |  |   |                                     |        |  |         |     |
| Date of commencement of studies             |  |  | Academic year of realisation of subject   |                                     |        | 2024/2025  |         |     |
| Education level                             | first-cycle studies  |  | Subject group   |                                     |        | Optional subject group   |         |     |
| Mode of study                               | Full-time studies  |  | Mode of delivery  |                                     |        | at the university  |         |     |
| Year of study                               | 4  |  | Language of instruction   |                                     |        | Polish   |         |     |
| Semester of study                           | 7  |  | ECTS credits  |                                     |        | 4.0  |         |     |
| Learning profile                            | general academic profile   |  | Assessment form   |                                     |        | assessment   |         |     |
| Conducting unit                             | Department of Engineering Structures -> Faculty of Civil and Environmental Engineering   |  |   |                                     |        |  |         |     |
| Name and surname<br>of lecturer (lecturers) | Subject supervisor   | dr inż. Małgorzata Lachowicz                                   |   |                                     |        |  |         |     |
|   | Teachers   |  | dr inż. Małgorzata Lachowicz  |                                     |        |  |         |     |
|   |  |  | dr inż. Paweł Piotrkowski   |                                     |        |  |         |     |
|   |  |  |   |                                     |        |  |         |     |
|   |  | dr hab. inż. Jerzy Bobiński                                    |   |                                     |        |  |         |     |
| Lesson types and methods                    | Lesson type  | Lecture  | Tutorial  | Laboratory                          | Projec | t  | Seminar | SUM |
| of instruction                              | Number of study hours  | 0.0  | 0.0   | 0.0                                 | 0.0    |  | 45.0    | 45  |
|   | E-learning hours included: 0.0   |  |   |                                     |        |  |         |     |
| Learning activity and number of study hours | Learning activity  | Participation in didactic<br>classes included in study<br>plan |   | Participation in consultation hours |        | Self-study SUN   |         | SUM |
|   | Number of study hours  | !  |   | 5.0                                 |        | 50.0   |         | 100 |
| Subject objectives                          | Familiarizing the student with the guidelines for writing an engineering thesis and working on presenting his/<br>her specialized knowledge.   |  |   |                                     |        |  |         |     |
| Learning outcomes                           | Course outcome   |  | Subject outcome   |                                     |        | Method of verification   |         |     |
|   | [K6_K02] is responsible for<br>reliability of obtained results of<br>research and its interpretation,<br>formulates conclusions and<br>describes results of own work   |  | The student independently verifies<br>the correctness of his or her<br>calculations and is able to draw<br>conclusions from the analyzes. |                                     |        | [SK5] Assessment of ability to<br>solve problems that arise in<br>practice<br>[SK3] Assessment of ability to<br>organize work<br>[SK2] Assessment of progress of<br>work |         |     |
|   | [K6_W16] Has deeper and<br>adequate knowlege of civil<br>engineering, within offered<br>specialization   |  | The student is able to<br>independently propose solutions<br>to more complex problems based<br>on previously acquired knowledge.          |                                     |        | [SW3] Assessment of knowledge<br>contained in written work and<br>projects   |         |     |
|   | [K6_K03] can think and act<br>creatively and enterprisingly,<br>obeys the etics code   |  | The student is able to write an engineering thesis using the knowledge acquired at earlier stages of learning.                            |                                     |        | [SK2] Assessment of progress of work   |         |     |
|   | [K6_U17] has specialized skills in<br>civil engineering within offered<br>specialization   |  | The student is able to perform<br>static and strength calculations for<br>the designed structural elements.                               |                                     |        | [SU4] Assessment of ability to use methods and tools   |         |     |
| Subject contents                            | Presentation of issues related to the workshop of writing an engineering thesis, its formal and editing requirements. Presentation of materials related to the organization of working time. Presentations of works to verify the ability to work in a team and the ability to argue the choice of the construction solution used. |  |   |                                     |        |  |         |     |
| Prerequisites<br>and co-requisites          | The student has the ability to design basic reinforced concrete elements.  |  |   |                                     |        |  |         |     |
| Assessment methods<br>and criteria          | Subject passing criteria   |  | Passing threshold   |                                     |        | Percentage of the final grade  |         |     |
|   |  |  | 50.0%   |                                     |        | 80.0%  |         |     |
|   |  |  | 50.0%   |                                     |        | 20.0%  |         |     |

| Recommended reading  | Basic literature         | Materials regarding text editing programs.<br>Work organization manuals.<br>Manuals on reinforced concrete structures.                      |  |  |  |  |
