

Subject card

Subject name and code	Mathematics, PG_00044536						
Field of study	Transport						
Date of commencement of studies	October 2021	Academic year of realisation of subject			2021/2022		
Education level	first-cycle studies	Subject group			Obligatory subject group in the field of study		
Mode of study	Full-time studies	Mode of delivery			at the university		
Year of study	1	Language of instruction			Polish		
Semester of study	2	ECTS credits			3.0		
Learning profile	general academic profile	Assessment form			assessment		
Conducting unit	Mathematics Center -> Vice-Rector for Education						
Name and surname of lecturer (lecturers)	Subject supervisor	dr Krzysztof Radziszewski					
	Teachers	mgr inż. Dorota Żarek dr Krzysztof Radziszewski					
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	15.0	15.0	0.0	0.0	0.0	30
	E-learning hours included: 0.0						
	Adresy na platformie eNauczanie: WILiŚ - Transport sem.2 - Matematyka 2021/2022 (K.Radziszewski) - Moodle ID: 20843 https://enauczanie.pg.edu.pl/moodle/course/view.php?id=20843						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	30		5.0		40.0	75
Subject objectives	Students obtain competence in the range of using methods of mathematical analysis and knowledge how to solve simple problems that can be found in the field of engineering.						

Learning outcomes	Course outcome	Subject outcome	Method of verification
	[K6_U71] is able to apply knowledge from humanistic, social, economic or legal sciences in order to solve problems in a social environment	Student: examines functions of several variables, using the concept of limit, continuity and derivatives, calculates double integrals, and explains the substitution method, applies double integrals to solve geometrical problems, demonstrates some techniques for solving ordinary differential equations. Student recognizes the importance of self-expanding knowledge and take the challenge of working with a group to solve a problem.	[SU2] Assessment of ability to analyse information
	[K6_W01] has basic knowledge of mathematical analysis, algebra, calculus of probability and operational research required for describing and solving transport problems	Student: examines functions of several variables, using the concept of limit, continuity and derivatives, calculates double integrals, and explains the substitution method, applies double integrals to solve geometrical problems, demonstrates some techniques for solving ordinary differential equations. Student recognizes the importance of self-expanding knowledge and take the challenge of working with a group to solve a problem.	[SW1] Assessment of factual knowledge
Subject contents	Functions of several variables. Partial derivatives. Total differential. Maxima and minima of a function of several variables. Ordinary differential equations: separable diff. eq., linear first-order diff. eq., Bernoulli's eq., linear diff. eq. with constant coefficients of higher order. Double integrals. Applications of double integrals.		
Prerequisites and co-requisites	There is no requirement.		
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	Midterm colloquium	50.0%	100.0%

Example issues/ example questions/ tasks being completed	<ol style="list-style-type: none"> Sketch the graph of the function $f(x,y)=(9-x^2-y^2)^{1/2}$. Identify any local extrema of the function $f(x,y)=e^{x-y}(x^2-2y^2)$. Find the absolute extrema of the function $f(x,y)=xy-x(x+1)-y(y+1)$ on the set $D=\{(x,y): x^2+y^2 \leq 25, y \geq 3\}$. Solve the equation $y''+6y'+9y=10\sin x$. Find the area between the two curves $y^2=4+x$ and $x+3y=0$. 		
Work placement	Not applicable
