

Subject card

Subject name and code	Practice , PG_00044664						
Field of study	Transport						
Date of commencement of studies	October 2021		Academic year of realisation of subject		2023/2024		
Education level	first-cycle studies		Subject group		Optional subject group		
Mode of study	Full-time studies		Mode of delivery		at the university		
Year of study	3		Language of instruction		Polish		
Semester of study	6		ECTS credits		6.0		
Learning profile	general academic profile		Assessment form		assessment		
Conducting unit	Department of Railway Engineering -> Faculty of Civil and Environmental Engineering						
Name and surname of lecturer (lecturers)	Subject supervisor		dr hab. inż. Marek Pszczoła				
	Teachers						
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	0.0	0.0	0.0	0.0	0.0	0
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	0		0.0		150.0	150
Subject objectives	1. familiar with the problems of maintenance of transport infrastructure (road, rail and maritime) 2. familiar with the problems of organization and management of road, air, rail and sea, 3. read the decision-making in the management of the transport company, 4. learning processes and practical methods of managing the flow of cargo volumes in modern logistics solutions in logistics companies, freight forwarding and courier 5. practical application of knowledge and skills acquired during their studies in practice.						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	[K6_W07] has basic knowledge of setting up in business as individuals and companies		The student is able to act in an entrepreneurial manner.				
	[K6_K01] able to think and act creatively and enterprisingly; able to define priorities to support the delivery of an individual or group task; understands the need for continuous education and taking responsibility as a professional for their work and the work of the team		The student is able to adapt to the market requirements, can organize a workplace.				
	[K6_U10] able to carry out simple engineering tasks related to the construction and operation of a selected element of the transport system, select the right methods and tools, select the right technical parameters for an object to be designed including economic and environmental aspects		The student is able to solve the tasks assigned by the employer.				
Subject contents	organizational structure and management of the company transport or transport department, management of transport projects diagnostics and repair of transport infrastructure, organization and management of traffic, materials management and storage in the enterprise, analysis of the transport market,						
Prerequisites and co-requisites							

Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	report	100.0%	100.0%
Recommended reading	Basic literature	not applicable	
	Supplementary literature	not applicable
