

## Subject card

Subject name and code	Informatics in geodesy , PG_00044794						
Field of study	Geodesy and Cartography						
Date of commencement of studies	October 2021	Academic year of realisation of subject			2021/2022		
Education level	first-cycle studies	Subject group			Obligatory subject group in the field of study		
Mode of study	Full-time studies	Mode of delivery			at the university		
Year of study	1	Language of instruction			Polish		
Semester of study	1	ECTS credits			7.0		
Learning profile	general academic profile	Assessment form			assessment		
Conducting unit	Department of Geodesy -> Faculty of Civil and Environmental Engineering						
Name and surname of lecturer (lecturers)	Subject supervisor	dr inż. Anna Sobieraj-Żłobińska					
	Teachers	dr inż. Wojciech Artichowicz dr inż. Tadeusz Widerski dr inż. Krystyna Michałowska dr inż. Anna Sobieraj-Żłobińska dr inż. Natalia Lasowicz dr inż. Daniel Burkacki					
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	45.0	0.0	30.0	15.0	0.0	90
	E-learning hours included: 0.0						
	Adresy na platformie eNauczanie: Informatyka w geodezji - 2021_2022zima - Moodle ID: 16520 <a href="https://enauzanie.pg.edu.pl/moodle/course/view.php?id=16520">https://enauzanie.pg.edu.pl/moodle/course/view.php?id=16520</a>						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours		Self-study	SUM	
	Number of study hours	90	12.0		73.0	175	
Subject objectives	The aim of this course is to acquaint students with the following subjects in the field of computer science: 1.overview of databases used in geodesy 2.introduction to programming in the Matlab/Octave/Scilab environment 3.introduction to C-Geo geodetic software.						

Learning outcomes	Course outcome	Subject outcome	Method of verification
	[K6_U05] is able to develop a simple algorithm and prepare a simple program in object-oriented language taking into account the geodetic specifics and the specificity of spatial information systems	The student is able to design and write a simple script and functions in the Matlab / Octave / Scilab environment in terms of the development of geodetic measurements, as well as their visualization using 2D and 3D charts.	[SU1] Assessment of task fulfilment [SU3] Assessment of ability to use knowledge gained from the subject [SU4] Assessment of ability to use methods and tools
	[K6_W06] has a well-grounded knowledge and understands geodesy concepts including the main methods of obtaining data about space together with the surveying and computational methods, which from the one hand are compatible with the current legal status and from the other hand refer to measurements on the plane and cover the use of modern geodetic instruments, with taking into account the curvature of the Earth and the impact of gravity on the manner of measurements and results	The student has knowledge of various measurement data and knows the methods of their initial analysis in order to prepare for calculations.	[SW3] Assessment of knowledge contained in written work and projects
	[K6_W04] has basic knowledge and understands the concepts of projection with elevations, Monge's and middle (perspective), has basic knowledge and understands the concepts of engineering graphics needed to work with CAD (Computer Aided Design) software in accordance with the standards and principles of geodesy, construction and IT including computer network technologies, databases and programming as well as surveying software	The student knows and understands the principles of creating databases used to perform basic geodetic calculations	[SW3] Assessment of knowledge contained in written work and projects
	[K6_U04] can use contemporary geodetic instruments, including automation of measurements, data transmission and processing in a computer-instrument system with the use of computer networks	The student is able to obtain measurement data, import and use them to perform automatic geodetic calculations	[SU4] Assessment of ability to use methods and tools

Subject contents	<p>I. Databases - basic issues</p> <p>Introduction, database structure.</p> <p>Basics of SQL - creating tables, modifying, updating.</p> <p>Database queries - filtering, sorting, conditional queries, analytical analysis.</p> <p>Spatial (cartographic) databases - reading, updating and data analysis.</p> <p>II. Lectures on programming in the Matlab/Octave/Scilab environment cover the following issues:</p> <p>1. Introducing and starting work in the Matlab/Octave/Scilab environment</p> <p>2. Variables and data types</p> <p>3. Matrices</p> <p>4. 2D charts</p> <p>5. 3D charts</p> <p>6. Interpolation</p> <p>7. Programming</p> <p>8. Functions and scripts</p> <p>9. Support for I/O files</p> <p>III. The lecture on the learning of the use of computer software for geodetic calculations includes:</p> <ul style="list-style-type: none"> <li>• presentations of the possibilities of C-geo software in geodetic applications,</li> <li>• discussion of computational possibilities,</li> <li>• discussion of graphic possibilities,</li> <li>• overview of the use of the program in planning geodetic works,</li> <li>• discussion of the preparation of input data to perform measurement works</li> </ul>														
Prerequisites and co-requisites															
Assessment methods and criteria	<table border="1" data-bbox="448 1576 1490 1711"> <thead> <tr> <th data-bbox="448 1576 794 1610">Subject passing criteria</th> <th data-bbox="794 1576 1141 1610">Passing threshold</th> <th data-bbox="1141 1576 1490 1610">Percentage of the final grade</th> </tr> </thead> <tbody> <tr> <td data-bbox="448 1610 794 1644">Cgeo</td> <td data-bbox="794 1610 1141 1644">60.0%</td> <td data-bbox="1141 1610 1490 1644">35.0%</td> </tr> <tr> <td data-bbox="448 1644 794 1677">Matlab</td> <td data-bbox="794 1644 1141 1677">60.0%</td> <td data-bbox="1141 1644 1490 1677">35.0%</td> </tr> <tr> <td data-bbox="448 1677 794 1711">Databases</td> <td data-bbox="794 1677 1141 1711">60.0%</td> <td data-bbox="1141 1677 1490 1711">30.0%</td> </tr> </tbody> </table>			Subject passing criteria	Passing threshold	Percentage of the final grade	Cgeo	60.0%	35.0%	Matlab	60.0%	35.0%	Databases	60.0%	30.0%
Subject passing criteria	Passing threshold	Percentage of the final grade													
Cgeo	60.0%	35.0%													
Matlab	60.0%	35.0%													
Databases	60.0%	30.0%
