

Subject card

Subject name and code	Construction project I, PG_00052618						
Field of study	Architecture						
Date of commencement of studies	October 2021		Academic year of realisation of subject		2022/2023		
Education level	first-cycle studies		Subject group		Optional subject group Subject group related to scientific research in the field of study		
Mode of study	Full-time studies		Mode of delivery		at the university		
Year of study	2		Language of instruction		Polish		
Semester of study	3		ECTS credits		2.0		
Learning profile	general academic profile		Assessment form		assessment		
Conducting unit	Department of Technical Fundamentals of Architecture Design -> Faculty of Architecture						
Name and surname of lecturer (lecturers)	Subject supervisor		dr Najmeh Hassas				
	Teachers		mgr inż. Tomasz Zybala				
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	0.0	0.0	0.0	30.0	0.0	30
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	30		4.0		16.0	50
Subject objectives	Development of the conceptual and construction concept of a residential building according to the chosen design assumption						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	[K6_U01] is able to use the experience gained during studies to critically analyze the conditions and formulate conclusions for design in an interdisciplinary context		[K6_W01] knows and understands construction problems, building and engineering issues related to building design; principles, solutions, constructions and building materials used in simple engineering tasks in the field of architectural and urban design [K6_U01] is able to use the experience gained during studies to critically analyze the conditions and formulate conclusions for design in an interdisciplinary context		[SU3] Assessment of ability to use knowledge gained from the subject [SU1] Assessment of task fulfilment		
	[K6_U02] is able to design an architectural object or a simple urban complex that meets the aesthetic and technical requirements		is able to design an architectural object or a simple urban complex that meets the aesthetic and technical requirements		[SU1] Assessment of task fulfilment		
Subject contents	Exercises on general building principles for single-family houses: Ground floor detail with floor on the ground according to individual assumptions; basement floor detail according to individual assumptions; general construction principles for single-family houses; roof or ceiling detail according to individual assumptions. Development for the object designed within the framework of the Architectural Project III, including: Structure of the object: static scheme of the building, detailed structural solutions. Technologies, architectural details, detailed solutions. Graphic arrangement and project specification.						
Prerequisites and co-requisites							
Assessment methods and criteria	Subject passing criteria		Passing threshold		Percentage of the final grade		
	General Building III		100.0%		100.0%
