	K6_W03	Student has a basic knowledge of theoretical chemistry. Student defines and describes basic laws and phenomena of electrochemistry, chemical kinetics and elementary molecular spectroscopy. Student solves calculation problems in electrochemistry, chemical kinetics and surface science. Student explains theoretical background of physicochemical experiments in electrochemistry, chemical kinetics, surface science and electronic spectroscopy. Student applies knowledge of electrochemistry, chemical kinetics, surface science and electronic spectroscopy in practical laboratory experiments.			[SW1] Assessment of factual knowledge		
	[K6_U03] can make detailed documentation of the results of self-conducted experiments and prepare a report describing these results	Student elaborates and interprets results of self-conducted physicochemical experiments. Student presents the results in the form of a report.			[SU1] Assessment of task fulfilment [SU2] Assessment of ability to analyse information
