	K6_W01	A student gains the basic knowledge in the field of mechanics and electromagnetism defines basic concepts, gives definitions of physical quantities and explains physical laws.			[SW1] Assessment of factual knowledge [SW3] Assessment of knowledge contained in written work and projects		
	K6_U01	A student -correctly writes and reads physical formulae, - distinguishes scalar and vector quantities, -understands fundamental physical laws, - predicts the following course of actions according to the physical laws, -sets up and solves physics problems in mechanics and electromagnetism. Can critically analyze information obtained on the basis of textbooks, the Internet and other sources.			[SU2] Assessment of ability to analyse information
