

Subject card

Subject name and code	Wiring Systems and Lighting Technology, PG_00053195						
Field of study	Electrical Engineering						
Date of commencement of studies	October 2021	Academic year of realisation of subject			2023/2024		
Education level	first-cycle studies	Subject group			Obligatory subject group in the field of study Subject group related to scientific research in the field of study		
Mode of study	Full-time studies	Mode of delivery			at the university		
Year of study	3	Language of instruction			Polish		
Semester of study	5	ECTS credits			4.0		
Learning profile	general academic profile	Assessment form			exam		
Conducting unit	Department of Electrical Power Engineering -> Faculty of Electrical and Control Engineering						
Name and surname of lecturer (lecturers)	Subject supervisor	prof. dr hab. inż. Stanisław Czapp					
	Teachers	prof. dr hab. inż. Stanisław Czapp dr inż. Kornel Borowski dr inż. Krzysztof Dobrzyński					
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	30.0	0.0	0.0	30.0	0.0	60
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours		Self-study		SUM
	Number of study hours	60	5.0		35.0		100
Subject objectives	Acquiring basic skills in designing electrical installations.						
Learning outcomes	Course outcome	Subject outcome			Method of verification		
	K6_K02	Student performs calculation of lighting illuminance, also with the use of specialist software. Student performs selection of protective devices and conductors.			[SK2] Assessment of progress of work		
	K6_U10	Individually performs project of electrical installation.			[SU4] Assessment of ability to use methods and tools		
K6_W11	Student specifies types of electrical lighting sources and describes its construction. Specifies basic photometric quantities. Student specifies types of conductors and protective devices. Analyses costs of installations operation with various types of electrical lighting sources.			[SW3] Assessment of knowledge contained in written work and projects			

Subject contents	<p>LECTURE Electrical installation. Low-voltage distribution and equipment. Wiring systems. Cables and cable components. Cables in fire hazard. Overcurrent and earth-leakage protection. Fuses and circuit-breakers applications. Motor control gear, contactors and protective relays, solid state equipment, remote control schemes. Discrimination, back-up protection, series rated system. Protection and control of current-using equipment. Installation planning examples: domestic premises, public buildings, high-rise buildings, hospitals, intelligent building. Electric lighting. Light and vision. Photometric quantities, units and concepts. Colour qualities, colour temperature and colour rendering index. Types of light sources and luminaries. Construction and operation, properties. Distortion of voltage and current. Lighting design technology. Calculations of illumination. Selection luminaries. Economic factors. Maintenance costs.</p> <p>PROJECT Performance of the project of electrical installation in building. The scope of the project is also lighting calculation using DIALux software.</p>											
Prerequisites and co-requisites												
Assessment methods and criteria	<table border="1"> <thead> <tr> <th data-bbox="453 517 794 546">Subject passing criteria</th> <th data-bbox="794 517 1141 546">Passing threshold</th> <th data-bbox="1141 517 1490 546">Percentage of the final grade</th> </tr> </thead> <tbody> <tr> <td data-bbox="453 553 794 577">Exam</td> <td data-bbox="794 553 1141 577">50.0%</td> <td data-bbox="1141 553 1490 577">50.0%</td> </tr> <tr> <td data-bbox="453 584 794 609">Project</td> <td data-bbox="794 584 1141 609">100.0%</td> <td data-bbox="1141 584 1490 609">50.0%</td> </tr> </tbody> </table>			Subject passing criteria	Passing threshold	Percentage of the final grade	Exam	50.0%	50.0%	Project	100.0%	50.0%
