

Subject card

Subject name and code	Informatic technologies, PG_00038380													
Field of study	Electrical Engineering													
Date of commencement of studies	October 2021		Academic year of realisation of subject		2021/2022									
Education level	first-cycle studies		Subject group		Obligatory subject group in the field of study									
Mode of study	Part-time studies		Mode of delivery		at the university									
Year of study	1		Language of instruction		Polish									
Semester of study	1		ECTS credits		2.0									
Learning profile	general academic profile		Assessment form		assessment									
Conducting unit	Department of Power Electronics and Electrical Machines -> Faculty of Electrical and Control Engineering													
Name and surname of lecturer (lecturers)	Subject supervisor		dr inż. Łukasz Sienkiewicz											
	Teachers		dr inż. Łukasz Sienkiewicz											
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM							
	Number of study hours	20.0	0.0	0.0	0.0	0.0	20							
	E-learning hours included: 0.0													
	Adresy na platformie eNauczanie: TECHNOLOGIE INFORMACYJNE [Niestacjonarne][2021/22] - Moodle ID: 16807 https://enauczanie.pg.edu.pl/moodle/course/view.php?id=16807													
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM							
	Number of study hours	20		2.0		28.0	50							
Subject objectives	The aim of the course is to present the basic information and definitions in the field of information technology, computer system, utility software, computer networks, databases, programming.													
Learning outcomes	Course outcome		Subject outcome			Method of verification								
	K6_W07		Student knows the basics of structural and object-oriented programming languages. He understands the basic stages of the programming process and is able to use development tools.			[SW3] Assessment of knowledge contained in written work and projects								
	K6_U03		The student knows the rules for preparing technical presentations. He can use MS Powerpoint software and open source equivalents(.odp). Student know how to use graphic techniques for visualizing engineering data.			[SU2] Assessment of ability to analyse information [SU5] Assessment of ability to present the results of task								
	K6_K01		The student is open to learning about new information technologies and uses software supporting the work of an engineer, moreover he can critically evaluate his skill level.			[SK5] Assessment of ability to solve problems that arise in practice [SK2] Assessment of progress of work								
Subject contents	Lecture Basic definition of Information Technology. Main components of PC and accessories. Example of computer applications: operating systems, CAD software etc. Digital processing of information (text, video, photo). Technical aspects and protocols of computer network (local area network). Data base, DataBase Management System													
Prerequisites and co-requisites														
Assessment methods and criteria	Subject passing criteria		Passing threshold		Percentage of the final grade									
	Midterm colloquium		60.0%		100.0%
