

## Subject card

Subject name and code	Differential equations in Physics and Technology, PG_00037294						
Field of study	Technical Physics						
Date of commencement of studies	October 2021		Academic year of realisation of subject		2022/2023		
Education level	first-cycle studies		Subject group		Obligatory subject group in the field of study Subject group related to scientific research in the field of study		
Mode of study	Full-time studies		Mode of delivery		at the university		
Year of study	2		Language of instruction		Polish		
Semester of study	3		ECTS credits		4.0		
Learning profile	general academic profile		Assessment form		assessment		
Conducting unit	Department of Atomic, Molecular and Optical Physics -> Faculty of Applied Physics and Mathematics						
Name and surname of lecturer (lecturers)	Subject supervisor		dr hab. inż. Maciej Demianowicz				
	Teachers		dr hab. inż. Maciej Demianowicz				
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	30.0	30.0	0.0	0.0	0.0	60
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	60		4.0		36.0	100
Subject objectives	Students become acquainted with methods of solving most popular differential equations encountered in physics and technics.						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	K6_W02		The student has a deep and structured knowledge in the field of the theory of differential equations and knows how to apply it to physics and technology.		[SW1] Assessment of factual knowledge		
	K6_U02		The student is able to solve scientific and technical problems requiring the ability to solve (mainly analytically) differential equations		[SU2] Assessment of ability to analyse information [SU4] Assessment of ability to use methods and tools		
	K6_W03		The student has a deep and structured knowledge in the field of the theory of differential equations and knows how to apply it to physics and technology.		[SW1] Assessment of factual knowledge		
Subject contents	1. First-order ordinary differential equations.  2. Second-order ordinary linear differential equations.  3. Systems of first-order ordinary linear differential equations.						
Prerequisites and co-requisites	Good knowledge of mathematical analysis.						
Assessment methods and criteria	Subject passing criteria		Passing threshold		Percentage of the final grade		
	Grade		50.0%		100.0%		

Recommended reading	Basic literature	<p>1. N. M. Matwiejew, Metody całkowania równań różniczkowych zwyczajnych, PWN, Warszawa, 1970</p> <p>2. W. W. Stiepanow, Równania różniczkowe, PWN, Warszawa, 1956</p>
	Supplementary literature	None.
	eResources addresses	<p>Adresy na platformie eNauczenie:</p> <p>Równania różniczkowe w fizyce i technice - Moodle ID: 26678  <a href="https://enauczanie.pg.edu.pl/moodle/course/view.php?id=26678">https://enauczanie.pg.edu.pl/moodle/course/view.php?id=26678</a></p>
Example issues/ example questions/ tasks being completed	<p>1. Present properties of the Wronskian of solutions of the second-order linear differential equations.</p> <p>2. Present the method of generalized power series.</p>	
Work placement	Not applicable
