

Subject card

Subject name and code	Profesional practice, PG_00037261						
Field of study	Technical Physics						
Date of commencement of studies	October 2021		Academic year of realisation of subject		2024/2025		
Education level	first-cycle studies		Subject group		Optional subject group		
Mode of study	Full-time studies		Mode of delivery		at the university		
Year of study	4		Language of instruction		Polish		
Semester of study	7		ECTS credits		6.0		
Learning profile	general academic profile		Assessment form		assessment		
Conducting unit	Department of Physics of Electronic Phenomena -> Faculty of Applied Physics and Mathematics						
Name and surname of lecturer (lecturers)	Subject supervisor		dr hab. Tomasz Wąsowicz				
	Teachers						
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	0.0	0.0	0.0	0.0	0.0	0
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	0		0.0		160.0	160
Subject objectives	The aim of the classes is to learn the student how to apply knowledge and skills achieved during the studies to solve practical problems						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	K6_U10		The student learns gradually		[SU2] Assessment of ability to analyse information [SU4] Assessment of ability to use methods and tools		
	K6_W09		The student applies knowledge of economics and knows the conditions and laws of the process of management in the work of an engineer.		[SW1] Assessment of factual knowledge		
	K6_U06		The student has an ability to plan the expences		[SU2] Assessment of ability to analyse information		
	K6_K01		The student learns gradually and applies knowledge to solve the newest problems		[SK5] Assessment of ability to solve problems that arise in practice		
	K6_K04		Student can effectively work with different teams given by institution superiors.		[SK1] Assessment of group work skills		
	K6_W10		The student is able to monitor and eliminate the undesirable effects of the development of technology and science and direct its research to the desired goals while respecting the existing standards.		[SW1] Assessment of factual knowledge		
	K6_W12		The student applies knowledge and skills achieved during the studies to fulfil tasks given by institution superiors.		[SW1] Assessment of factual knowledge		
Subject contents	Division Applied Physics: Participation in duties of employees of the institution in at least one task from the following: 1. Familiarising with methodology of running theoretical and experimental research. 2. Numerical modeling of physical phenomena 3. Running theoretical research 4. Design, assembly, commissioning, testing and diagnostics of experimental apparatus. 5. Running experimental research. 6. Processing and analysis of experimental data and numerical outputs 7. Various forms of data presentation. 8. Modeling and analysis of industrial and technological processes. 9. Design, assembly, commissioning, testing and diagnostics of industrial apparatus. 10. Processing and analysis of industrial results and forms of their presentation. 11. Education in Physics and outreach.						

Prerequisites and co-requisites	Knowledge and skills achieved during the studies.		
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	overcoming of the professional experience	100.0%	100.0%
Recommended reading	Basic literature	No recommendations	
	Supplementary literature	No recommendations	
	eResources addresses	Adresy na platformie eNauczanie:	
Example issues/ example questions/ tasks being completed	no comment		
Work placement	Not applicable
