

Subject card

Subject name and code	Teleinformatic networks, PG_00037345						
Field of study	Technical Physics						
Date of commencement of studies	October 2021		Academic year of realisation of subject		2023/2024		
Education level	first-cycle studies		Subject group		Optional subject group Subject group related to scientific research in the field of study		
Mode of study	Full-time studies		Mode of delivery		at the university		
Year of study	3		Language of instruction		Polish		
Semester of study	5		ECTS credits		4.0		
Learning profile	general academic profile		Assessment form		assessment		
Conducting unit	Zakład Fizyki Teoretycznej i Informatyki Kwantowej -> Instytut Fizyki i Informatyki Stosowanej -> Faculty of Applied Physics and Mathematics						
Name and surname of lecturer (lecturers)	Subject supervisor		dr inż. Bartosz Reichel				
	Teachers		dr inż. Bartosz Reichel				
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	15.0	0.0	30.0	0.0	0.0	45
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	45		10.0		45.0	100
Subject objectives	Acquainted with the basic methods of data transmission, division of ICT equipment. Layer model of the ISO / OSI network.						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	K6_U02		Implement of basic control sum		[SU2] Assessment of ability to analyse information		
	K6_U03		Understanding the operation of the network based on ISO / OSI model		[SU1] Assessment of task fulfilment		
	K6_K01		Student is aware of his strengths and weaknesses		[SK5] Assessment of ability to solve problems that arise in practice		

Subject contents	Laboratory		
	1) Implementation of algorithms: parity bit, modulo sum, CRC 2) The breakdown of the data on to packets, analysis of impact of the size of the header to the size of the package 3) Implementation of minimum spanning tree algorithms 4) Tracking and analysis of the network traffic. Elements of physics related to signal propagation.		
	Lectures:		
	1. Elements of data transmission Channel, signal, information and modulation: parameters and characteristics. Spectrum, bandwidth, Modulation rate, transmission speed, propagation rate. Synchronous and asynchronous transmission. Receiver synchronization and transmission coding. Error models in transmission channels, elementary error rate. Detection and correction codes. Parity bit and CRC.		
	2. LAN and WLAN Ethernet (IEEE 802.3): access rule for common medium, device addressing, technologies and parameters, structured cabling, devices (hub, switch). Fast- (IEEE 802.3u) and Gigabit Ethernet (IEEE 802.3 ab / z). Minimal spanning tree (STP). Other solutions: Token Ring and FDDI (IEEE 802.5):		
	3. Access network Access channels: V.24 (RS232), USB, V.21-V.92 modems, ISDN, ADSL and HDSL modems. Parameters and ranges of application.		
	4. MAN and WAN network Analog and digital connections: PDH and SDH telecommunications hierarchy. FrameRelay network: principle of operation, layered model, permanent and switched virtual connection, parameters and costs of application. ATM network: operating principle, layered model, logical channel and path, devices. Parameters and scope of application.		
	5. Protocols and services in ICT networks Protocol definition and protocol classification. Protocols in layered models. Ethernet II ARP ICMP IP TCP and UDP DNS HTTP MQTT		
	6. Security. Symmetric / asymmetric encryption. Weaknesses and strengths of selected solutions. Attack methods (e.g. Man in the Middle)		
Prerequisites and co-requisites	No requirements		
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	Project	50.0%	100.0%
Recommended reading	Basic literature	D.E. Comer , Sieci komputerowe i intersieci, WNT, Warszawa, 2003 A. Sopala, Pisanie programów internetowych, Mikom, Warszawa, 2000	
	Supplementary literature	No requirements	
	eResources addresses	Adresy na platformie eNauczanie: Sieci Teleinformatyczne 2023 - Moodle ID: 33914 https://enauzanie.pg.edu.pl/moodle/course/view.php?id=33914	
Example issues/ example questions/ tasks being completed			
Work placement	Not applicable
