

## Subject card

Subject name and code	Mathematical Analysis, PG_00021503						
Field of study	Mathematics						
Date of commencement of studies	October 2021		Academic year of realisation of subject		2022/2023		
Education level	first-cycle studies		Subject group		Obligatory subject group in the field of study Subject group related to scientific research in the field of study		
Mode of study	Full-time studies		Mode of delivery		at the university		
Year of study	2		Language of instruction		Polish		
Semester of study	3		ECTS credits		10.0		
Learning profile	general academic profile		Assessment form		exam		
Conducting unit	Department of Nonlinear Analysis and Statistics -> Faculty of Applied Physics and Mathematics						
Name and surname of lecturer (lecturers)	Subject supervisor		dr inż. Marcin Styborski				
	Teachers		dr inż. Marcin Styborski				
			dr inż. Robert Krawczyk				
			dr inż. Magdalena Chmara				
			mgr inż. Urszula Goławska				
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	60.0	60.0	0.0	0.0	0.0	120
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	120		5.0		125.0	250
Subject objectives	The aim of the course is to familiarize students with the basics (definitions, theorems, methods of calculation and problem-solving methods) of integral calculus of functions of several variables and its applications in field theory, physical and technical issues.						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	K6_U06				[SU3] Assessment of ability to use knowledge gained from the subject		
	K6_U02				[SU1] Assessment of task fulfilment [SU2] Assessment of ability to analyse information		
	K6_U04				[SU2] Assessment of ability to analyse information [SU4] Assessment of ability to use methods and tools		
	K6_W07				[SW1] Assessment of factual knowledge [SW3] Assessment of knowledge contained in written work and projects		
	K6_W04				[SW1] Assessment of factual knowledge		

Subject contents	Riemann integral in n-dimensional space. Fubini theorem and iterated integrals. Sets of measure zero and volume zero, the integral over a measurable set. Lebesgue integrability criterion in the sense of Riemann. Normal regions and their properties. Change of variables in multiple integrals . Curvilinear integrals. Green theorem and its applications. Surface integrals. Gauss - Ostrogradsky theorem. Stokes theorem. Elements of field theory: a divergence and rotation of a vector field. Gradient fields. Applications of curvilinear, multiple and surface integrals in physics and engineering. Introduction to the theory of Lebesgue measure and integration.		
Prerequisites and co-requisites	Knowledge of previous courses of mathematical analysis (analysis I and analysis II: calculus of functions of several variables, integral calculus of functions of one variable)		
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	a completion of the exercises	50.0%	50.0%
	an exam	50.0%	50.0%
Recommended reading	Basic literature	W. Rudin, " <i>Principles of Mathematical Analysis</i> ," PWN, Warsaw 2009. G. Fichtenholz, " <i>Differential and integral calculus</i> ", PWN, Warsaw 1976.	
	Supplementary literature	M. Spivak, " <i>Calculus on manifolds</i> ", PWN, Warsaw 1977.	
	eResources addresses	Adresy na platformie eNauczanie: Analiza matematyczna III - Moodle ID: 26895 <a href="https://enauczanie.pg.edu.pl/moodle/course/view.php?id=26895">https://enauczanie.pg.edu.pl/moodle/course/view.php?id=26895</a>	
Example issues/ example questions/ tasks being completed	Calculate a double/ triple/ path/ surface integral.  Apply the theorem of Green/ Gauss/ Stokes.		
Work placement	Not applicable
