

Subject card

Subject name and code	Monographic lecture, PG_00039733									
Field of study	Materials Engineering, Materials Engineering, Materials Engineering									
Date of commencement of studies	October 2021		Academic year of realisation of subject		2023/2024					
Education level	first-cycle studies		Subject group		Optional subject group					
Mode of study	Full-time studies		Mode of delivery		at the university					
Year of study	3		Language of instruction		Polish					
Semester of study	6		ECTS credits		1.0					
Learning profile	general academic profile		Assessment form		assessment					
Conducting unit	Zakład Materiałoznawstwa I Technologii Materiałowych -> Institute of Manufacturing and Materials Technology -> Faculty of Mechanical Engineering and Ship Technology									
Name and surname of lecturer (lecturers)	Subject supervisor		dr hab. Agata Lisińska-Czekaj							
	Teachers		dr hab. Agata Lisińska-Czekaj							
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM			
	Number of study hours	15.0	0.0	0.0	0.0	0.0	15			
E-learning hours included: 0.0										
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM			
	Number of study hours	15		1.0		9.0	25			
Subject objectives	To introduce students to the latest developments in the design, manufacture, shaping the properties and use of construction materials.									
Learning outcomes	Course outcome		Subject outcome		Method of verification					
	K6_K02		The student is able to present the development trends in the use of heat-resistant and creep-resistant materials in the industry		[SK5] Assessment of ability to solve problems that arise in practice					
	K6_U03		The student knows the groups of materials resistant to corrosion and wear and is able to indicate the criteria for their selection for industrial applications		[SU2] Assessment of ability to analyse information					
	K6_W08		The student is able to present the development trends in the use of heat-resistant and creep-resistant materials in the industry		[SW1] Assessment of factual knowledge					
	K6_U07		The student is able to access databases and obtain relevant literature data		[SU2] Assessment of ability to analyse information [SU3] Assessment of ability to use knowledge gained from the subject					
Subject contents	Technological and industrial challenges in the field of sustainable development (conditions, choices, energy, advanced materials and nanotechnologies, climate protection, production, information and communication technologies, innovation, commercialization). Recent developments in the design, manufacture, development of properties and operation of materials for use in extreme conditions.									
Prerequisites and co-requisites										
Assessment methods and criteria	Subject passing criteria		Passing threshold		Percentage of the final grade					
	written test		51.0%		100.0%					

Recommended reading	Basic literature	<ol style="list-style-type: none"> 1. Pampuch R., Materiały ceramiczne. Zarys nauki o materiałach nieorganiczno-niemetalicznych, WN PWN, Warszawa, 1988 2.
