Subject objectives		Knowledge about key concepts of hipertext and hipermedia						
Learning outcomes		Course outcome	Subject outcome			Method of verification		
		[K6_U07] can apply methods of process and function support, specific to the field of study	The student presents his own system of acquiring and presenting information using selected technologies.			[SU1] Assessment of task fulfilment		
		[K6_W04] knows and understands, to an advanced extent, the principles, methods and techniques of programming and the principles of computer software development or programming devices or controllers using microprocessors or programmable elements or systems specific to the field of study, and organisation of systems using computers or such devices	The student describes the basic issues of presentation, transformation and synchronization of information in a distributed system, describes modern technologies for the implementation of hypermedia and related services, and presents its own system for acquiring and presenting information using selected technologies.			[SW1] Assessment of factual knowledge		
		[K6_U04] can apply knowledge of programming methods and techniques as well as select and apply appropriate programming methods and tools in computer software development or programming devices or controllers using microprocessors or programmable elements or systems specific to the field of study	The student presents his own system of acquiring and presenting information using selected technologies.			[SU1] Assessment of task fulfilment		

Subject contents	1. Introduction to hypertext and hypermedia 2. Document structure description with markups. 3. HTML syntax 4. Web page design: text, lists, multimedia. interactive forms creation: actions and data, tables 5. Cascading Style Sheets 6. XML: document structure vs presentation 7. DTD, XML Schema document definitions 8. XSL transformation 9. Transclusion: XPath, XLink, XPointer 10. Animation: SVG
