GDAŃSK UNIVERSITY OF TECHNOLOGY

Subject card

Subject name and code	Introduction to Computer Networks, PG_00047949		
Field of study	Biomedical Engineering, Biomedical Engineering, Biomedical Engineering		
Date of commencement of studies	October 2021	Academic year of realisation of subject	2023/2024
Education level	first-cycle studies	Subject group	Optional subject group Subject group related to scientific research in the field of study
Mode of study	Full-time studies	Mode of delivery	at the university
Year of study	3	Language of instruction	Polish
Semester of study	5	ECTS credits	3.0
Learning profile	general academic profile	Assessment form	assessment
Conducting unit	Department of Computer Communications -> Faculty of Electronics, Telecommunications and Informatics		
Name and surname of lecturer (lecturers)	Subject supervisor	dr inż. Krzysztof Nowicki	
	Teachers	dr inż. Krzysztof Nowicki mgr inż. Jakub Grochowski prof. dr hab. inż. Józef Woźniak	

Lesson types and methods of instruction

Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
Number of study hours	30.0	0.0	15.0	0.0	0.0	45

E-learning hours included: 0.0

Learning activity and number of study hours

Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours	Self-study	SUM
Number of study hours	45	3.0	27.0	75

Subject objectives

Student becomes familiar with logical layered architectures, classifies basic networking problems and identifies and analyzes selected protocols and mechanisms implemented in standard LAN and WAN solution

Learning outcomes

Course outcome	Subject outcome	Method of verification
[K6_U07] can apply methods of process and function support, specific to the field of study	The student is able to use the methods of process support and design, construction and configuration of computer networks	[SU4] Assessment of ability to use methods and tools
[K6_W03] knows and understands, to an advanced extent, the construction and operating principles of components and systems related to the field of study, including theories, methods and complex relationships between them and selected specific issues - appropriate for the curriculum	Student is able to analyze and differentiate the work of selected systems and network devices.	[SW1] Assessment of factual knowledge
[K6_K01] is ready to cultivate and disseminate models of proper behaviour in and outside the work environment; make independent decisions; critically evaluate actions of their own, teams they lead and organisations they are part of; take responsibility for results of these actions; responsibly perform professional roles, including:n - observing rules of professional ethics and require it from others,n - care for the achievements and traditions of the professionn	The student is able to make decisions independently, critically evaluate the activities of teams in the field of building complex network systems	[SK4] Assessment of communication skills, including language correctness [SK1] Assessment of group work skills

Subject contents	1. Classification and general characteristics of computer networks 2. Layered network architectures - ISO / OSI, TCP / IP 3. Theoretical foundations of data transmission 4. Problems of designing the data link layer (synchronization, flow control, error detection and detection) 5. LAN networks - general characteristics - classification of access methods 6. Wired solutions of the competitive type: Ethernet networks - MAC layer functions and medium access rules - IEEE 802.3 standard 7. Wireless LANs - general characteristics 8. IEEE 802.11 standard - operating modes 9. Standard 802.11 - methods access 10. New technologies of Ethernet network 11. 10/40/100 Gb / s Ethernet 12. Methods of connecting LAN networks 13. Local virtual networks 14. Wide area computer networks - WAN networks 15. TCP / IP architecture - IP protocols and transport protocols 16 IPv6 protocols, addressing, 17. Migration of IPv4 / IPv6 18. Routing methods in WAN networks 19. Methods of preventing congestion in IP networks 20 Network Security
Prerequisites and co-requisites	

Assessment methods and criteria

Subject passing criteria	Passing threshold	Percentage of the final grade
lec.	50.0%	60.0%
lab.	50.0%	40.0%

Recommended reading	Basic literature	Nowicki K., Woźniak J.: Przewodowe i bezprzewodowe sieci LAN, OW PW 2002
	Supplementary literature	Tannenbaum A.: Computer Networks, Prentice Hall; Nowicki K.: Ethernet - sieci, mechanizmy, Infotech Nowicki K, Światowiak J.: Protokoły IPv6 Krawczyk H., Kaczmarek S., Nowicki K. - Aplikacje i usługi a technologie sieciowe, WN PWN 2018
	eResources addresses	Adresy na platformie eNauczanie: Wstęp do sieci komputerowych 2023/24 - Moodle ID: 31543 https://enauczanie.pg.edu.pl/moodle/course/view.php?id=31543
Example issues/ example questions/ tasks being completed	Description of network architectures and basic standards. Comparison of standard wired and wireless LAN networks. Comparison of methods and devices for connecting networks. Description of addressing methods in LAN and WAN networks. Description and comparison of selected routing protocols and basic communication protocols in IP networks. Description of selected network applications.	
Work placement	Not applicable
