

Subject card

Subject name and code		Electromagnetic Compatibility of Medical Equipment, PG_00049348						
Field of study		Biomedical Engineering, Biomedical Engineering, Biomedical Engineering						
Date of commencement of studies		October 2021	Academic year of realisation of subject			2024/2025		
Education level		first-cycle studies	Subject group			Optional subject group Subject group related to scientific research in the field of study		
Mode of study		Full-time studies	Mode of delivery			at the university		
Year of study		4	Language of instruction			Polish		
Semester of study		7	ECTS credits			2.0		
Learning profile		general academic profile	Assessment form			assessment		
Conducting unit		Department of Biomedical Engineering -> Faculty of Electronics, Telecommunications and Informatics						
Name and surname of lecturer (lecturers)		Subject supervisor		dr inż. Adam Bujnowski				
		Teachers		dr inż. Adam Bujnowski mgr inż. Kamil Osiński				
Lesson types and methods of instruction		Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
		Number of study hours	15.0	0.0	15.0	0.0	0.0	30
		E-learning hours included: 0.0						
Learning activity and number of study hours		Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours		Self-study		SUM
		Number of study hours	30	2.0		18.0		50
Subject objectives		The goal of the subject is to familiarize students with the electromagnetic compatibility issues. There will be shown and categorized typical sources of noise signals and coupling methods. There will be shown basic norms related to the EMC and typical design approaches to improve devices functionality in presence of EMC disturbances.						
Learning outcomes		Course outcome		Subject outcome		Method of verification		
		[K6_K02] is ready to critically assess possessed knowledge and acknowledge the importance of knowledge in solving cognitive and practical problems		Student knows risk and analyses risk of lack of the EMC		[SK5] Assessment of ability to solve problems that arise in practice		
		[K6_U08] while identifying and formulating specifications of engineering tasks related to the field of study and solving these tasks, can: n- apply analytical, simulation and experimental methods, n- notice their systemic and non-technical aspects, n- make a preliminary economic assessment of suggested solutions and engineering work n		Student can analyse and identify EMC problems Student uses analytic tools to evaluate EMC problems		[SU2] Assessment of ability to analyse information [SU4] Assessment of ability to use methods and tools		
		[K6_W06] Knows and understands the basic processes occurring in the life cycle of devices, facilities and systems specific to a given field of study.		Student knows basic issues with distortion sources and coupling methods Student knows basic norm in area of EMC Student knows basic design rules to comply with EMC		[SW1] Assessment of factual knowledge [SW3] Assessment of knowledge contained in written work and projects		

Subject contents	<p>Principal terms for electromagnetic compatibility</p> <p>Norms and regulations in Poland, EU and worldwide</p> <p>Distribution of electromagnetic waves</p> <p>Interferences in electronic equipment, coupling and methods of coupling</p> <p>Immunity measurement for ESD</p> <p>immunity tests for strong magnetic fields</p> <p>Immunity tests</p> <p>Immunity tests for short electric pulses and electric discharges</p> <p>Immunity tests for short interruptions and fallouts of electric supply</p> <p>Immunity measurements in the EMC. Echoless chambers</p> <p>Instrumentation for the EMC</p> <p>Typical techniques of improving and assuring of the EMC</p>											
Prerequisites and co-requisites												
Assessment methods and criteria	<table border="1"> <thead> <tr> <th data-bbox="453 1106 794 1137">Subject passing criteria</th> <th data-bbox="799 1106 1141 1137">Passing threshold</th> <th data-bbox="1145 1106 1485 1137">Percentage of the final grade</th> </tr> </thead> <tbody> <tr> <td data-bbox="453 1137 794 1169">final writing</td> <td data-bbox="799 1137 1141 1169">50.0%</td> <td data-bbox="1145 1137 1485 1169">50.0%</td> </tr> <tr> <td data-bbox="453 1169 794 1200">laboratory achievements</td> <td data-bbox="799 1169 1141 1200">50.0%</td> <td data-bbox="1145 1169 1485 1200">50.0%</td> </tr> </tbody> </table>			Subject passing criteria	Passing threshold	Percentage of the final grade	final writing	50.0%	50.0%	laboratory achievements	50.0%	50.0%
