GDAŃSK UNIVERSITY OF TECHNOLOGY

Subject card

Subject name and code	Mathematics III, PG_00055104
Field of study	Mechanical Engineering

Date of commencement of studies	October 2021	Academic year of realisation of subject	2022/2023
Education level	first-cycle studies	Subject group	Obligatory subject group in the field of study
Mode of study	Part-time studies	Mode of delivery	at the university
Year of study	2	Language of instruction	Polish
Semester of study	3	ECTS credits	5.0
Learning profile	general academic profile	Assessment form	assessment

Conducting unit	Mathematics Center -> Vice-Rector for Education

Name and surname of lecturer (lecturers)	Subject supervisor	dr Leszek Ziemczonek
	Teachers	dr Leszek Ziemczonek

Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	15.0	15.0	0.0	0.0	0.0	30
	E-learning hours included: 0.0						

Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours	Self-study	SUM
	Number of study hours	30	5.0	90.0	125

Subject objectives	The aim of this subject is to obtain the students competence in the range of using the basic methods of mathematical analysis and linear algebra. Furthermore, the student is able to use this knowledge to solve simple theoretical and practical problems that can be found in the field of engineering.

Learning outcomes	Course outcome	Subject outcome	Method of verification
	[K6_U01] is able to acquire information from specialized literary sources, databases and other resources, essential for solving engineering tasks; is able to compile the obtained information pieces and to interpret them, additionally is able to form conclusions and present justified opinion	Student combines knowledge of mathematics with knowledge from other fields.	
	[K6_W01] possesses mathematical knowledge within the range of linear algebra and mathematical analysis useful in characterising and interpreting mechanical systems, technological processes and operational properties of devices	Student recognizes the importance of skillful use of basic mathematical apparatus in terms of study in the future.	[SW2] Assessment of knowledge contained in presentation

Subject contents	
	Number series. Convergence tests of the number series.
	Triple integrals and their applications. Volume of solids. Mass of body.
	Complex numbers. Operations on complex numbers.
	Algebraic and trigonometric forms.
	Moivre formula.
	Radicals of complex numbers.
	Ordinary differential equations. First order differential equations.
	General and particular solution.
	Separable variables, linear, Bernoulli differential equations.
	Second order linear differential equations with constant coefficients.
	Non-homogeneous linear differential equations.

Prerequisites and co-requisites	Knowledge of differential and integral calculus of one variable functions. Knowledge of matrix calculus.

Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	written exam	50.0%	50.0%
	midterm colloquium	50.0%	50.0%

	eResources addresses	Adresy na platformie eNauczanie:
Example issues/ example questions/ tasks being completed	1. Use triple integral to calculate volume of solid bounded by surfaces: $x^2 + y^2 - 2z = 0$, $z = 2$. 2. Solve differential equation: $y'' - 5y' + 4y = 4x^2e^{2x}$.	
Work placement	Not applicable
