

Subject card

Subject name and code	Electrical Engineering, PG_00055098							
Field of study	Mechanical Engineering							
Date of commencement of studies	October 2021		Academic year of realisation of subject			2022/2023		
Education level	first-cycle studies		Subject group			Obligatory subject group in the field of study		
Mode of study	Part-time studies		Mode of delivery			at the university		
Year of study	2		Language of instruction			English		
Semester of study	3		ECTS credits			2.0		
Learning profile	general academic profile		Assessment form			assessment		
Conducting unit	Department of Power Electronics and Electrical Machines -> Faculty of Electrical and Control Engineering						Engineering	
Name and surname	Subject supervisor dr inż. Filip Kutt							
of lecturer (lecturers)	Teachers		dr inż. Filip Kutt					
	dr inż. Łukasz Sienkiewicz							
		dr inż. Krzysztof Iwan						
Lesson types and methods	Lesson type	Lecture	Tutorial	Laboratory	Projec	t	Seminar	SUM
of instruction	Number of study hours	15.0	0.0	15.0	0.0		0.0	30
	E-learning hours inclu	uded: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study SUM		SUM
	Number of study hours	30		5.0		15.0		50
Subject objectives	The objective of the course is to familiarize students with the basic laws of electrical engineering and the basics of electrical and electromechanical energy conversion							
Learning outcomes	Course outcome		Subject outcome			Method of verification		
	[K6_U05] is able to plant an experiment within the range of measuring the basic operating parameters of mechanical devices using a specialized equipment, interpret the results and reach the correct conclusions		The student has the ability to read electrical diagrams. The student has the ability to interpret and correctly analyse the results of simulation and experimental research			[SU2] Assessment of ability to analyse information [SU4] Assessment of ability to use methods and tools		
	[K6_W10] possesses basic knowledge on electronics and electrical engineering					[SW1] Assessment of factual knowledge		
Subject contents	Principles and laws of electrical engineering. Measurements of electrical and non-electrical quantities. Electric drives. Production and distribution of electricity in the power system. Basics of electronics and power electronics. Rules for safe work with electrical devices							
Prerequisites and co-requisites	Knowledge of basic laws of physics. Ability to use tools of analytical mathematics							
Assessment methods	Subject passing criteria		Passing threshold			Percentage of the final grade		
and criteria	Written exam		50.0%			50.0%		
	Practical exercises		50.0%			50.0%		

Data wydruku: 10.04.2024 03:27 Strona 1 z 2

Recommended reading	Basic literature	Hambley A. R. Electrical Engineering Principles And Application, Pearson 2014 Szumanowski A. Basics of Electrical Engineering, Electrotechnics, Electronics And Electric Machines Oficyna Wydawnicza Politechniki Warszawskiej		
	Supplementary literature	Dennis T. H. Practical Marine Electrical Knowledge, Witherby Seamanship International Ltd		
Example issues/ example questions/ tasks being completed	Provide and explain the definition of electric current. Present and explain the definitions of the RMS value of electric current. How can the speed of an induction / asynchronous motor be controlled?			
Work placement	Not applicable			

Data wydruku: 10.04.2024 03:27 Strona 2 z 2
