

## Subject card

Subject name and code	Intellectual Property Protection, PG_00050150							
Field of study	Mechanical Engineering							
Date of commencement of studies	October 2021		Academic year of realisation of subject		2022/2023			
Education level	first-cycle studies		Subject group		Obligatory subject group in the field of study			
Mode of study	Part-time studies		Mode of delivery		at the university			
Year of study	2		Language of instruction		Polish			
Semester of study	4		ECTS credits		1.0			
Learning profile	general academic profile		Assessment form		assessment			
Conducting unit	Department of Manufacturing and Production Engineering -> Faculty of Mechanical Engineering and Ship Technology							
Name and surname of lecturer (lecturers)	Subject supervisor		dr inż. Sławomir Szymański					
	Teachers		dr inż. Sławomir Szymański					
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Projec	t	Seminar	SUM
	Number of study hours	8.0	0.0	0.0	0.0		0.0	8
	E-learning hours included: 0.0							
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study		SUM
	Number of study hours	8		1.0		16.0		25
Subject objectives	Acquiring basic knowledge in the field of intellectual and industrial property protection  Acquiring the ability to independently prepare a patent application registration of a trademark and industrial (utility) design							

Data wydruku: 09.04.2024 13:46 Strona 1 z 3

Learning outcomes	Course outcome	Subject outcome	Method of verification				
	[K6_K01] is aware of the need for complementing the knowledge throughout the whole life, is able to select proper methods of teaching and learning, critically assesses the possessed knowledge; is aware of the importance of professional conduct and following the rules of professional ethics; is able to show resourcefulness and innovation in the realisation of professional projects	The student is able to independently update knowledge in the field of intellectual property protection using resources UPRP, World Intellectual Property Organization (WIPO)					
	K6_W12] possesses basic knowledge necessary to understand the ex-technical conditions of engineering activity, cossesses basic knowledge on management, including quality management and running commercial enterprise, within the range of protection of intellectual property and patent law; knows general principles of creating and leveloping forms of individual entrepreneurship and basic HSE ules applicable to machine ndustry						
	[K6_U11] is able to analyse the operation of devices and compare the construction solutions applying usage, safety, environmental, economic and legal criteria	The student is able to independently prepare an application, patent and register the application in the UPRP, register a utility model, trademark (name, logo)					
Subject contents	The concept of intellectual property						
	2. Characteristics of copyright and industrial property rights						
	3. Procedure for obtaining a national patent in the UPRP and a European patent in the EPO						
	4. Procedure for registering a trademark, utility model and industrial design						
	5. The concept of plagiarism and the law of fair use and citation						
	6. Protection of databases and computer programs						
	7. Protection of intellectual property on the Internet						
Prerequisites and co-requisites	not applicable						
Assessment methods	Subject passing criteria	Passing threshold	Percentage of the final grade				
and criteria	test	60.0%	70.0%				
	prezentation	60.0%	30.0%
