

GDAŃSK UNIVERSITY

Subject card

Subject name and code	Chipless Process Engineering, PG_00040074								
Field of study	Mechanical Engineering								
Date of commencement of studies	October 2021		Academic year of realisation of subject			2023/2024			
Education level	first-cycle studies		Subject group			Optional subject group Subject group related to scientific research in the field of study			
Mode of study	Part-time studies		Mode of delivery			blende	blended-learning		
Year of study	3		Language of instruction			Polish	Polish		
Semester of study	5		ECTS credits			5.0	5.0		
Learning profile	general academic profile		Assessment form			assessment			
Conducting unit	Department of Materials Engineering and Bonding -> Faculty of Mechanical Engineering and Ship Technology								
Name and surname of lecturer (lecturers)	Subject supervisor	dr inż. Michał Landowski							
	Teachers		dr inż. Michał Landowski						
	dr hab. inż. Dariusz Fydrych								
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Projec	:t	Seminar	SUM	
	Number of study hours	22.0	0.0 15.0 0.0			0.0	37		
	E-learning hours included: 22.0								
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study SUM		SUM	
	Number of study hours	37		11.0		77.0		125	
Subject objectives	The student has to know the basis for the production of welded structures, castings and by forming								
Learning outcomes	Course outcome		Subject outcome			Method of verification			
	[K6_U08] is able to design a technological manufacturing process for typical elements of machines or devices, using analytical and numerical calculating tools					[SU1] Assessment of task fulfilment [SU2] Assessment of ability to analyse information			
	[K6_W08] possesses basic knowledge including the methodology of designing machine parts, mechanical devices, selection of construction materials, manufacturing and operation, with the lifetime cycle		The student is able to select materials for a specific application.			[SW1] Assessment of factual knowledge			

and co-requisites Assessment methods and criteria Subject passing criteria Passing threshold Percentage of the final grade written exam Basic literature 60.0% 40.0% Recommended reading Basic literature 1. Poradnik Inżyniera: Spawalnictwo, t1, t2, t3, WNT, Warszawa 2003. PResources addresses Adresy na platformie eNauczanie: Technologia procesów bezwidowych, PG_00040074,W/L, MIBM NST, sem. GS, arrow 22324 - Moode ID: 3961 Example issues/ example questions/ tasks being completed Discuss the die design processe. Discuss the role of lubricants in plastic forming processes.	Subject contents	Introduction: basic notions. Basic concepts regarding the organizational system foundries and plastic processing plant. Forming Technologies. Automation and robotics forming processes. Technical documentation, design and technology. Welding processes. Characteristics and properties of welded joints. Manual metal arc welding. Submerged arc welding. Oxyacetylene welding. Gas metal arc welding (MIG/ MAG). Gas tungsten arc welding (TIG). Plasma arc Welding. Laser beam Welding. Electron beam Welding. Resistance welding, Friction Welding, Explosive Welding, Welding of plastics. Soldering and Brazing. Induction soldering, dip soldering, electro-brazing, gas brazing, torch brazing, Furnace brazing. Braze welding. Thermal cutting methods: gas cutting, electro-cutting, plasma arc cutting. Gouging. Water jet cutting. Safety of welding work.
