

§ GDAŃSK UNIVERSITY § OF TECHNOLOGY

Subject card

Subject name and code	Essentials of Automatics, PG_00047537							
Field of study	Automatic Control, Cybernetics and Robotics							
Date of commencement of studies	October 2021		Academic year of realisation of subject			2022/2023		
Education level	first-cycle studies		Subject group			Obligatory subject group in the field of study		
Mode of study	Full-time studies		Mode of delivery			at the university		
Year of study	2		Language of instruction			Polish		
Semester of study	3		ECTS credits			5.0		
Learning profile	general academic profile		Assessment form			exam		
Conducting unit	Department of Automatic Control -> Faculty of Electronics, Telecommunications and Informatics						ics	
Name and surname of lecturer (lecturers)	Subject supervisor dr inż. Piotr Kaczmarek							
	Teachers		dr inż. Piotr Kaczmarek					
		dr inż. Janusz Kozłowski						
Lesson types and methods	Lesson type	Lecture	Tutorial	Laboratory	Projec	:t	Seminar	SUM
of instruction	Number of study hours	30.0	30.0	0.0	0.0		0.0	60
	E-learning hours included: 0.0							
Learning activity and number of study hours	Learning activity Participation ir classes includ plan		I didactic Participation in ed in study consultation hours		Self-study		SUM	
	Number of study 60 5.0 hours		5.0	60.0			125	
Subject objectives	Introduction of basic concepts of automatic control systems.							
Learning outcomes	Course outcome		Subject outcome			Method of verification		
	[K6_W03] Knows and understands, to an advanced extent, the construction and operating principles of components and systems related to the field of study, including theories, methods and complex relationships between them and selected specific issues - appropriate for the curriculum		Student knows the presented methods of analysis and synthesis of control systems and understands how they are related to each other			[SW1] Assessment of factual knowledge		
	[K6_W01] Knows and understands, to an advanced extent, mathematics necessary to formulate and solve simple issues related to the field of study		Student knows various methods of modeling of dynamic systems and understands how they are related to each other			[SW1] Assessment of factual knowledge		
	[K6_W05] Knows and understands, to an advanced extent, methods of supporting processes and functions, specific to the field of study		Student knows various quantitative measures of performance performance and understands their use in the specification and synthesis of control systems			[SW1] Assessment of factual knowledge		

Subject contents	Modeling of dynamic systems: differential equations, transfer functions, block diagrams, state-space model						
	Responses of first and second orde	r plants; direct control quality indexes	quality indexes, dominant poles				
	BIBO and asymptotic stability						
	Steady-state performance						
	Root locus analysis and controller design						
	Frequency response and indirect control quality indexes						
	Stability in the frequency domain; Stability margins						
	Frequency-domain controller design						
Prerequisites and co-requisites	Calculus, Complex Calculus, Algebra						
Assessment methods	Subject passing criteria	Passing threshold	Percentage of the final grade				
and criteria	Exam	60.0%	50.0%				
	Exercices	60.0%	50.0%				
Recommended reading	Basic literature	N.S. Nise, Control Systems Enginee	neering, Wiley, 2010.				
		R.C. Dorf, R.H. Bishop, Modern Cor	າ Control Systems, Prentice Hall, 2008.				
	F. Golnaraghi, B.C. Kuo, Automatic Control Systems, Wiley,						
	Supplementary literature	S. Skogestat, I, Postlethwaite, Multivariable Feedback Control: Analysis and Design, Wiley, 2005.					
	eResources addresses	ources addresses Adresy na platformie eNauczanie:					
Example issues/ example questions/ tasks being completed							
Work placement	Not applicable
