|--|--|--|---------------------------------------|--|--|--|
|  | [K6_U42] can apply tools and methods of designing, optimization, monitoring, management, increasing reliability and protection from safety hazards in local and distributed information systems and applications   | The student knows and can apply the Front Controler design templates, MVC, routing tables. He understands the concept of data sanitization;  | [SU1] Assessment of task fulfilment   |  |  |  |
|  | [K6_U08] while identifying and formulating specifications of engineering tasks related to the field of study and solving these tasks, can:n- apply analytical, simulation and experimental methods,n- notice their systemic and non-technical aspects,n-make a preliminary economic assessment of suggested solutions and engineering work n | The student uses the development environment to create, test and design a project task; The student uses the production environment to launch and present the final form of the project task.                                  | [SU1] Assessment of task fulfilment   |  |  |  |
|  | [K6_U43] can analyse date and formulate, apply and assess appropriate formal models and algorithms for solving problems in the field of information systems and applications   | Student is able to choose the right architecture of the web solution depending on the needs  | [SU1] Assessment of task fulfilment   |  |  |  |
|  | [K6_W41] Knows and understands, to an advanced extent, the operation and evaluation criteria of data processing, storage and transfer methods, including computational algorithms, artificial intelligence and data mining   | The student understands: HTTP communication support (POST and GET transmission); script-side processing of the server, preserving the data in the database; General information about the site and keeping them in WebStorage. | [SW1] Assessment of factual knowledge |  |  |  |
|  | [K6_W03] Knows and understands, to an advanced extent, the construction and operating principles of components and systems related to the field of study, including theories, methods and complex relationships between them and selected specific issues - appropriate for the curriculum   | The student uses knowledge in the field of digital documents, basics of programming and network communication. He knows the rules of operation and processing of scripts on the client's side as well as on the server side.   | [SW1] Assessment of factual knowledge |  |  |  |
| Subject contents   | 1. Internet protocols, Internet architecture (DNS servers; protocols: HTTP, HTTPS, HTTP / 2; URI, URL,   |  |                                       |  |  |  |
| Subject contents   | URN);  2. The client side - browser (javaScript, DOM, jQuery, Responsive Web Design);  3. Server side (PHP, handling of HTTP requests, MongoDB as an example of a database, session mechanism, introduction to access control issues, MVC pattern);  |  |                                       |  |  |  |
| Prerequisites and co-requisites                                | No requirements  |  |                                       |  |  |  |
| Assessment methods   | Subject passing criteria   | Passing threshold  | Percentage of the final grade         |  |  |  |
| and criteria   | Project  | 50.0%  | 50.0%                                 |  |  |  |
|  | Written exam   | 50.0%  | 50.0%                                 |  |  |  |
| Recommended reading  | Basic literature   | L. Shklar, R. Rosen: Web Application Architecture: Principles, Protocols and Practices, 2nd ed., Wiley, 2009   |                                       |  |  |  |
|  | Supplementary literature No requirements   |  |                                       |  |  |  |
