

Subject card

Subject name and code	Internet Services Architectures, PG_00053907						
Field of study	Informatics						
Date of commencement of studies	October 2021		Academic year of realisation of subject		2023/2024		
Education level	first-cycle studies		Subject group		Optional subject group Subject group related to scientific research in the field of study		
Mode of study	Full-time studies		Mode of delivery		at the university		
Year of study	3		Language of instruction		Polish		
Semester of study	5		ECTS credits		3.0		
Learning profile	general academic profile		Assessment form		assessment		
Conducting unit	Department of Computer Architecture -> Faculty of Electronics, Telecommunications and Informatics						
Name and surname of lecturer (lecturers)	Subject supervisor		dr hab. inż. Joanna Szlarczyńska				
	Teachers		dr hab. inż. Joanna Szlarczyńska mgr inż. Michał Wójcik mgr inż. Konrad Zawora				
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	30.0	0.0	15.0	0.0	0.0	45
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	45		4.0		26.0	75
Subject objectives	The goal is to make students familiar with modern architectures of distributed systems as well as technologies implementing those architectures.						

Learning outcomes	Course outcome	Subject outcome	Method of verification
	[K6_W04] Knows and understands, to an advanced extent, the principles, methods and techniques of programming and the principles of computer software development or programming devices or controllers using microprocessors or programmable elements or systems specific to the field of study, and organisation of systems using computers or such devices	Knows and understands the organization of cloud computing systems.	[SW1] Assessment of factual knowledge
	[K6_W01] Knows and understands, to an advanced extent, mathematics necessary to formulate and solve simple issues related to the field of study	Knows and understands mathematics to the extent necessary to calculate simple issues related to the operations of the cloud computing systems, e.g. determining the size of an instance pool based on the current load.	[SW1] Assessment of factual knowledge
	[K6_U09] can carry out a critical analysis of the functioning of existing technical solutions and assess these solutions, as well as apply experience related to the maintenance of technical systems, devices and facilities typical for the field of studies, gained in the professional engineering environment	Can make a critical analysis of how services work in the cloud. Is able to use the experience related to maintaining high-availability systems in the cloud.	[SU1] Assessment of task fulfilment
	[K6_U04] can apply knowledge of programming methods and techniques as well as select and apply appropriate programming methods and tools in computer software development or programming devices or controllers using microprocessors or programmable elements or systems specific to the field of study	Is able to use his knowledge of programming methods and techniques in creating software in serverless architecture.	[SU1] Assessment of task fulfilment

Subject contents	1. Passing criteria 2. What is cloud computing 3. Cloud economics 4. Basic cloud services 5. Security in the cloud 6. Databases in the cloud 7. Flexibility of cloud applications 8. High availability and fault tolerance 9. Cloud infrastructure management automatization 10. Data storage in the cloud 11. Reliability of cloud applications 12. Performance of cloud applications 13. Cost effectiveness 14. Design patterns for cloud applications		
Prerequisites and co-requisites	Basic knowledge of virtualization and Linux-based operating systems		
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	laboratory exercises	50.0%	50.0%
	exam	50.0%	50.0%
Recommended reading	Basic literature	1. Lecture notes available on eNauczanie platform 2. Aurobindo Sarkar, Amit Shah, Learning AWS, 2015 3. Andreas Wittig, Michael Wittig, Amazon Web Services in Action, 2015	
	Supplementary literature	1. AWS platform documentation	
	eResources addresses	Adresy na platformie eNauczanie: 2023/2024 - Architektury Usług Internetowych - Moodle ID: 27928 https://enauzanie.pg.edu.pl/moodle/course/view.php?id=27928	
Example issues/ example questions/ tasks being completed	Design and implementation of a cloud application taking advantage of load-balancing mechanisms Design and implementation of a cloud application using databases Design and implementation of a cloud application taking advantage of auto-scaling mechanisms		
Work placement	Not applicable
