

## Subject card

|   |  |  |   |                                     |  |            |     |
|---|--|--|---|-------------------------------------|--|------------|-----|
| Subject name and code                       | Programming of Internet Applications, PG_00047983  |  |   |                                     |  |            |     |
| Field of study                              | Informatics  |  |   |                                     |  |            |     |
| Date of commencement of studies             | October 2021   |  | Academic year of realisation of subject |                                     | 2024/2025  |            |     |
| Education level                             | first-cycle studies  |  | Subject group                           |                                     | Optional subject group<br>Subject group related to scientific research in the field of study |            |     |
| Mode of study                               | Full-time studies  |  | Mode of delivery                        |                                     | at the university  |            |     |
| Year of study                               | 4  |  | Language of instruction                 |                                     | Polish   |            |     |
| Semester of study                           | 7  |  | ECTS credits                            |                                     | 3.0  |            |     |
| Learning profile                            | general academic profile   |  | Assessment form                         |                                     | exam   |            |     |
| Conducting unit                             | Department of Algorithms and Systems Modelling -> Faculty of Electronics, Telecommunications and Informatics               |  |   |                                     |  |            |     |
| Name and surname of lecturer (lecturers)    | Subject supervisor   |  | dr inż. Krzysztof Manuszewski           |                                     |  |            |     |
|   | Teachers   |  | dr inż. Krzysztof Manuszewski           |                                     |  |            |     |
| Lesson types and methods of instruction     | Lesson type  | Lecture  | Tutorial                                | Laboratory                          | Project  | Seminar    | SUM |
|   | Number of study hours  | 15.0   | 0.0                                     | 15.0                                | 0.0  | 0.0        | 30  |
|   | E-learning hours included: 0.0   |  |   |                                     |  |            |     |
| Learning activity and number of study hours | Learning activity  | Participation in didactic classes included in study plan |   | Participation in consultation hours |  | Self-study | SUM |
|   | Number of study hours  | 30   |   | 3.0                                 |  | 42.0       | 75  |
| Subject objectives                          | The major goal is to prepare students to design and implement modern, responsive and scalable WWW and mobile applications. |  |   |                                     |  |            |     |

| Learning outcomes               | Course outcome  | Subject outcome  | Method of verification                |
|---------------------------------|---|--|---------------------------------------|
|                                 | [K6_W42] Knows and understands, to an advanced extent, architecture, design principles and methods of hardware and software support for local and distributed information systems, including computing systems, databases, computer networks and information applications, as well as the principles of human cooperation with computers and computer-aided teamwork  | Is able to assessment and modify the efficiency of WWW system. Is able to use modern tools and patterns for purpose of development of WWW and mobile solutions | [SW1] Assessment of factual knowledge |
|                                 | [K6_W04] Knows and understands, to an advanced extent, the principles, methods and techniques of programming and the principles of computer software development or programming devices or controllers using microprocessors or programmable elements or systems specific to the field of study, and organisation of systems using computers or such devices  | Is able to assessment and modify the efficiency of WWW system. Is able to use modern tools and patterns for purpose of development of WWW and mobile solutions | [SW1] Assessment of factual knowledge |
|                                 | [K6_W03] Knows and understands, to an advanced extent, the construction and operating principles of components and systems related to the field of study, including theories, methods and complex relationships between them and selected specific issues - appropriate for the curriculum  | knows communication protocols.   | [SW1] Assessment of factual knowledge |
|                                 | [K6_U03] can design, according to required specifications, and make a simple device, facility, system or carry out a process, specific to the field of study, using suitable methods, techniques, tools and materials, following engineering standards and norms, applying technologies specific to the field of study and experience gained in the professional engineering environment  | Is able to design and implement both server and client side of system  | [SU1] Assessment of task fulfilment   |
|                                 | [K6_U41] can produce, test or evaluate software using modern programming platforms, tools, languages and paradigms of different levels, as well as use software packages supporting scientific and research processes as well as business decision-making processes and teamwork  | knows and is able to use communication protocols.  | [SU1] Assessment of task fulfilment   |
| Subject contents                | <p>JavaScript - native mechanism vs. object oriented mechanisms, emulation of other known mechanisms</p> <p>Modern approach to client side code in JS, Unit tests, Libraries and frameworks (jQuery/ExtJS)</p> <p>Possible alternatives for Javascript – Tools and solutions, E.g.Typescript, CoffeeScript</p> <p>Implementation of server side logic. MVC pattern. (ASP.Net MVC)</p> <p>Javascript on the server side: NodeJS</p> <p>Application hosted in browser (SilverLight)</p> |  |                                       |
| Prerequisites and co-requisites | C#, knowledge in area of HTML, HTTP   |  |                                       |

|  |                          |   |                               |
|--|--------------------------|---|-------------------------------|
| Assessment methods and criteria                                | Subject passing criteria | Passing threshold   | Percentage of the final grade |
|  |                          | 40.0%   | 40.0%                         |
|  |                          | 60.0%   | 60.0%                         |
