

Subject card

Subject name and code	JEE Tools and Applications, PG_00047971						
Field of study	Informatics						
Date of commencement of studies	October 2021	Academic year of realisation of subject			2024/2025		
Education level	first-cycle studies	Subject group			Optional subject group Subject group related to scientific research in the field of study		
Mode of study	Full-time studies	Mode of delivery			at the university		
Year of study	4	Language of instruction			Polish		
Semester of study	7	ECTS credits			5.0		
Learning profile	general academic profile	Assessment form			exam		
Conducting unit	Department of Computer Architecture -> Faculty of Electronics, Telecommunications and Informatics						
Name and surname of lecturer (lecturers)	Subject supervisor		dr inż. Tomasz Boiński				
	Teachers		dr inż. Tomasz Boiński				
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	30.0	0.0	30.0	0.0	0.0	60
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	60		5.0		60.0	125
Subject objectives	Teaching technologies, mechanisms and tools necessary to create enterprise-class applications using the Java Enterprise Edition (Java EE) platform.						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	[K6_U01] can apply mathematical knowledge to formulate and solve complex and non-typical problems related to the field of study and perform tasks, in an innovative way, in not entirely predictable conditions, by:n- appropriate selection of sources and information obtained from them, assessment, critical analysis and synthesis of this information,n- selection and application of appropriate methods and toolsn		Student understands what enterprise class applications are. Is able to name architectural layers typical of applications based on the Java EE platform. Knows the different types of components used in each layer. Understands how the components work together. Can describe the life cycle of individual components. Is able to list and describe the individual stages of processing user requests. Understands what authentication and authorization processes are. Knows advanced database utilization mechanisms.		[SU4] Assessment of ability to use methods and tools [SU1] Assessment of task fulfilment		
	[K6_U02] can perform tasks related to the field of study in an innovative way as well as solve complex and nontypical problems, applying knowledge of physics, in changing and not fully predictable conditions		Student is able to prepare an enterprise class application based on the Java EE platform. Is able to choose the right components for individual architectural layers. Is able to implement and use authentication and authorization processes. Is able to use advanced database utilization mechanisms.		[SU1] Assessment of task fulfilment [SU4] Assessment of ability to use methods and tools		

Subject contents	<ol style="list-style-type: none"> 1. Enterprise class applications. 2. Java EE Platform. 3. Servlet. 4. JavaServer Pages. 5. Contexts and Dependency Injections (CDI), 6. JavaServer Faces (JSF). 7. Java API for RESTful Web Services (JAX-RS). 8. Angular. 9. Java Persistence API (JPA). 10. Bean Validation. 11. Java EE Security. 12. Java Authentication and Authorization Service (JAAS). 13. Enterprise JavaBeans (EJB). 14. PrimeFaces. 		
Prerequisites and co-requisites	<p>It is required to complete the Technological Platforms (Java part) course and to learn the following topics:</p> <ul style="list-style-type: none"> • Java Collections and introduction to generics, • Java Beans and overview of standard Java classes, • Enum types, • multithreading programming in Java, • networking and mobile in Java, • parsing XML in Java, • persistence (database access in Java SE). 		
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	Written exam	50.0%	50.0%
	Practical exercise	50.0%	50.0%
Recommended reading	Basic literature	<ul style="list-style-type: none"> • Eclipse Foundation, Jakarta EE 8 Tutorial. • Oracle, Java EE 8 Tutorial. • Oracle, Java EE 7 Tutorial. • WildFly Team, Java EE 7 Tutorial. • WildFly Team, WildFly Documentation. 	
	Supplementary literature	No requirements.	
	eResources addresses	Adresy na platformie eNauczenie:	
Example issues/ example questions/ tasks being completed			
Work placement	Not applicable
