

Subject card

| Subject name and code | Database Applications, PG_00047964 | | | | | | | |
|---|---|--|---|-------------------------------------|------------|--|---------|-----|
| Field of study | Informatics | | | | | | | |
| Date of commencement of studies | October 2021 | | Academic year of realisation of subject | | | 2024/2025 | | |
| Education level | first-cycle studies | | Subject group | | | Optional subject group | | |
| | | | | | | Subject group related to scientific research in the field of study | | |
| Mode of study | Full-time studies | | Mode of delivery | | | at the university | | |
| Year of study | 4 | | Language of instruction | | | Polish | | |
| Semester of study | 7 | | ECTS credits | | | 2.0 | | |
| Learning profile | general academic profile | | Assessment form | | assessment | | | |
| Conducting unit | Department of Software Engineering -> Faculty of Electronics, Telecommunications and Informatics | | | | | | | |
| Name and surname of lecturer (lecturers) | Subject supervisor | | mgr inż. Marcin Kwiatkowski | | | | | |
| | Teachers | | mgr inż. Marcin Kwiatkowski | | | | | |
| Lesson types and methods of instruction | Lesson type | Lecture | Tutorial | Laboratory | Projec | t | Seminar | SUM |
| | Number of study hours | 15.0 | 0.0 | 15.0 | 0.0 | 0.0 | | 30 |
| | E-learning hours included: 0.0 | | | | | | | |
| Learning activity and number of study hours | Learning activity | Participation in didactic classes included in study plan | | Participation in consultation hours | | Self-study | | SUM |
| | Number of study hours | 30 | | 2.0 | | 18.0 | | 50 |
| Subject objectives | The aim of the course is to familiarize a student with non-relational data models, especially with object-relational and object model. The second part of the course is devoted to selected problems of database servers. | | | | | | | |

| Learning outcomes | Course outcome | Subject outcome | Method of verification | | | | |
|--|---|--|--|--|--|--|--|
| | [K6_U07] can apply methods of process and function support, specific to the field of study | The student is able to design an object-relational database in order to use it in a simple business process. | [SU2] Assessment of ability to analyse information | | | | |
| | [K6_W03] Knows and understands, to an advanced extent, the construction and operating principles of components and systems related to the field of study, including theories, methods and complex relationships between them and selected specific issues - appropriate for the curriculum | Student knows how to design object-relational database. Student knows how DBMSs implement concurrency and transactions also in distributed environments. | [SW1] Assessment of factual knowledge | | | | |
| | [K6_W41] Knows and understands, to an advanced extent, the operation and evaluation criteria of data processing, storage and transfer methods, including computational algorithms, artificial intelligence and data mining | The student knows the issues of data storage and data processing in object-relational and object-oriented systems. | [SW1] Assessment of factual knowledge | | | | |
| | [K6_U42] can apply tools and methods of designing, optimization, monitoring, management, increasing reliability and protection from safety hazards in local and distributed information systems and applications | Student is able to introduce data seciruty mechanisms to a database implementation. | [SU4] Assessment of ability to use methods and tools | | | | |
| | [K6_U06] can analyse the operation of components, circuits and systems related to the field of study, measure their parameters and examine technical specifications | Student is able to compare the expressiveness of relational and object-relational queries. | [SU3] Assessment of ability to use knowledge gained from the subject | | | | |
| Subject contents | 1. Object-relational model 2. Collections, objects, and references 3. SQL-99 & SQL 2003 standards - non-relational extensions 4. Object-relational systems 5. Implementation of object-relational model in Oracle - user data types. 6. Implementation of object-relational model in Oracle - operations. 7. Classes and types. 8. Object persistence. 9. Object database schema. 10. Object vs. relational schema. 11. Transactions - definitions & problems. 12. Recovery and ROLLBACK. 13. Cursors and triggers. | | | | | | |
| Prerequisites and co-requisites | Student has knowledge of relational model, and he/she can design simple databases. Student must not be allowed to begin the course without having successfully passed by Bazy Danych and Inzynieria Oprogramowania courses. | | | | | | |
| Assessment methods | Subject passing criteria | Passing threshold | Percentage of the final grade | | | | |
| and criteria | Poprawność zadań | 50.0% | 60.0% | | | | |
| | Kolokwium | 50.0% | 40.0% | | | | |
