

Subject card

Subject name and code	Computer Systems Administration, PG_00053911							
Field of study	Informatics							
Date of commencement of studies	October 2021		Academic year of realisation of subject		2023/2024			
Education level	first-cycle studies		Subject group		Optional subject group Subject group related to scientific research in the field of study			
Mode of study	Full-time studies		Mode of delivery			at the university		
Year of study	3		Language of instruction			Polish		
Semester of study	5		ECTS credits			5.0		
Learning profile	general academic profile		Assessment form		exam			
Conducting unit	Department of Comp	uter Architectu	re -> Faculty of	Electronics, To	elecomr	nunicati	ions and Info	matics
Name and surname	Subject supervisor dr inż. Tomasz Boiński							
of lecturer (lecturers)	Teachers		dr inż. Krzysztof Cwalina					
		dr inż. Tomasz Boiński						
Lesson types and methods	Lesson type	Lecture	Tutorial	Laboratory	Projec	t	Seminar	SUM
of instruction	Number of study hours	30.0	0.0	15.0	15.0		0.0	60
	E-learning hours inclu	uded: 0.0						
Learning activity and number of study hours	Learning activity Participation ir classes includ plan				Self-study SUM			
	Number of study hours	60		6.0		59.0		125
Subject objectives	The aim of the subject is to familiarize students with topics connected with administering Linux and Windows based servers and provide means of interoperability between them							
Learning outcomes	Course outcome		Subject outcome			Method of verification		
[K6_W03] Knows and understands, to an advanced extent, the construction and operating principles of components and systems related to the field of study, including theories, methods and complex relationships between them and selected specific issues - appropriate for the curriculum [K6_W04] Knows and understands, to an advanced extent, the principles, methods and techniques of programming and the principles of computer software development or programming devices or controllers using microprocessors or programmable elements or systems specific to the field of study, and organisation of systems using computers or such devices		dvanced ion and of stems related including nd complex in them and ues -	Student knows and describes system components in regard to computer system administration Student knows and describes complex system components in regard to computer system deployment and administration Student understands and describes cooperation of information systems in regard to computer system administration			[SW1] Assessment of factual knowledge		
		Student creates system scripts Student administers complex information systems		[SW1] Assessment of factual knowledge

Subject contents	Menagmenet of Windows systems					
	2. Administrative tools in Windows					
	2. Administrative tools in vvindows					
	3. Configuration and management of network in Windows					
	4. Internet Information Services - IIS					
	5. Hardware configuration in Windows systems					
	6. Windows Server Management					
	7. SQL Server Administration					
	8. User management in Linux systems					
	9. Advanced network administration in Linux systems					
	10. NIS and LDAP Directory Services					
	11. Filesystem management in Linux System					
	12. Construction of Linux Kernel					
	13. Mail servers in Linux systems					
	14. WWW and proxy servers in Linux systems					
	15. Printing and office software in Linux					
	16. XWindow configuration					
	17. Hardware support in Linux					
18. Security in Linux Systems						
	19. Security in Windows Systems					
Prerequisites and co-requisites	Basic knowledge of Windows and Linux Systems					
Assessment methods	Subject passing criteria	Passing threshold	Percentage of the final grade			
and criteria	Written exam	30.0%	50.0%			
	Practical exercise	30.0%	25.0%			
	Project	30.0%	25.0%
