

Subject card

Subject name and code	Elements of discrete mathematics, PG_00045294						
Field of study	Data Engineering						
Date of commencement of studies	October 2021	Academic year of realisation of subject			2021/2022		
Education level	first-cycle studies	Subject group			Obligatory subject group in the field of study Subject group related to scientific research in the field of study		
Mode of study	Full-time studies	Mode of delivery			at the university		
Year of study	1	Language of instruction			English		
Semester of study	2	ECTS credits			2.0		
Learning profile	general academic profile	Assessment form			assessment		
Conducting unit	Department of Algorithms and Systems Modelling -> Faculty of Electronics, Telecommunications and Informatics						
Name and surname of lecturer (lecturers)	Subject supervisor		dr inż. Joanna Raczek				
	Teachers		dr inż. Joanna Raczek				
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	15.0	15.0	0.0	0.0	0.0	30
	E-learning hours included: 0.0						
Adresy na platformie eNauczanie: Elements of Discrete Mathematics 2022 - Moodle ID: 11650 https://enauczanie.pg.edu.pl/moodle/course/view.php?id=11650							
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours	Self-study	SUM		
	Number of study hours	30	4.0	16.0	50		
Subject objectives	Acquiring the ability to use a formal mathematical language. Acquiring the ability to express relationships, dependencies, configurations in a strict form. Understanding the essence of proof reasoning and construction.						
Learning outcomes	Course outcome	Subject outcome			Method of verification		
	[K6_W06] Knows the criteria and concepts of artificial intelligence, understands the operation of algorithms for intelligent computing, the concept of descriptive logic, combinatorial optimization algorithms, methods of construction, analysis and evaluation of algorithms, including discrete ones and problems of resolving conflicts in non-algorithmic decision making.	The student understands the difference between easy and difficult algorithmic problems. For the latter, he becomes familiar with possible approaches to find approximate solutions using heuristics.			[SW1] Assessment of factual knowledge		
	[K6_W01] has basic knowledge in the field of mathematics, including mathematical analysis, algebra, geometry, probability calculus, statistics and numerical methods, necessary to formulate and solve simple tasks in the field of IT	The student learns about the concepts of discrete mathematics used in other branches of mathematics. In addition, he learns to solve problems.			[SW1] Assessment of factual knowledge		
	[K6_U03] analyses problems and creates appropriate models, data structures and algorithms (including heuristic and numerical ones), assesses their computational complexity, estimates errors of the received solutions	Student gets knowledge and abilities in graph theory and algorithms.			[SU1] Assessment of task fulfilment		

Subject contents	Set algebra. Propositional statements. Predicate calculus. Mathematical induction. Binary relations: equivalence relations, the principle of abstraction, orders, transitive and equivalence closures. Basics of counting and generation of combinatorial objects (functions, locations, divisions - Stirling numbers). Graph theory - notation, basic concepts, euler graphs, the Chinese postman problem, hamilton graphs, the traveling salesman problem, tree properties, planarity, graph colorings.		
Prerequisites and co-requisites	Basic mathematical skills		
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	Test	51.0%	100.0%
	Activity in class	0.0%	0.0%
Recommended reading	Basic literature	K. H. Rosen, Discrete Mathematics and Its Applications K. A. Ross, C. R. Wright, Discrete Mathematics	
	Supplementary literature	R.J. Wilson, Introduction to graph theory	
	eResources addresses	Elements of Discrete Mathematics 2022 - Moodle ID: 11650 https://enauczenie.pg.edu.pl/moodle/course/view.php?id=11650	
Example issues/ example questions/ tasks being completed			
Work placement	Not applicable
