

Subject card

Subject name and code	Fiberoptic Technology in Telecommunications, PG_00048128						
Field of study	Electronics and Telecommunications						
Date of commencement of studies	October 2021		Academic year of realisation of subject		2023/2024		
Education level	first-cycle studies		Subject group		Optional subject group Subject group related to scientific research in the field of study		
Mode of study	Full-time studies		Mode of delivery		at the university		
Year of study	3		Language of instruction		Polish		
Semester of study	6		ECTS credits		3.0		
Learning profile	general academic profile		Assessment form		exam		
Conducting unit	Department of Microwave and Antenna Engineering -> Faculty of Electronics, Telecommunications and Informatics						
Name and surname of lecturer (lecturers)	Subject supervisor		dr hab. inż. Łukasz Kulas				
	Teachers		dr hab. inż. Łukasz Kulas dr hab. inż. Piotr Kowalczyk				
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	15.0	0.0	15.0	0.0	0.0	30
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	30		3.0		42.0	75
Subject objectives	Introduction to design of fiber optic systems with the focus on its most important elements (optical fiber, transmitter, receiver, optical amplifiers, etc.) and testing methods.						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	[K6_W34] Knows the characteristics of telecommunications channels, methods of securing information, modulation systems, methods of access to the channel.		During the lecture student gains knowledge about parameters of optical fibers, optical transmitters and receivers, connectors important to create a complete fiber-optic system.		[SW1] Assessment of factual knowledge		
	[K6_U05] can plan and conduct experiments related to the field of study, including computer simulations and measurements; interpret obtained results and draw conclusions		Practical skills in analysis, calculation of parameters and basic design of fiber-optic system.		[SU1] Assessment of task fulfilment		
	[K6_W35] Knows the concepts of the technique of signal transmission, operation of telecommunications networks and multimedia services and the rules for providing them		Theoretical knowledge about concepts, composition, operation, measurements of the most important components of fiberoptic links.		[SW1] Assessment of factual knowledge		

Subject contents	<p>Lecture</p> <ul style="list-style-type: none">• Introduction to fiberoptic systems• Optical fibers – methods of analysis• Classification of optical fibers• Attenuation in fiberoptic systems• Methods of connecting optical fibers• Multimodal dispersion in optical fibers• Chromatic dispersion in optical fibers• Useful bandwidth in optical fibers• Optical receivers and transmitters• Amplifiers in fiberoptic systems• Couplers in fiberoptic systems• Components of fiberoptic links• Measurements of fiberoptic link's performance• Designing of fiberoptic links• Designing of fiberoptic systems <p>Laboratory</p> <ul style="list-style-type: none">• Introduction to fiberoptic systems - classification of optical fibers, preparation and methods of connecting optical fibers• Optical receivers and transmitters• Chromatic and multimodal dispersion in optical fibers• Useful bandwidth in optical fibers - measurement of attenuation in optical fibers• Reflectometer measurement of fiberoptic systems								
Prerequisites and co-requisites	<p>Basic knowledge of optical phenomenons, propagation of electromagnetic waves, modulation techniques and telecommunication systems parameters.</p> <p>Participation in laboratory classes is obligatory.</p>								
Assessment methods and criteria	<table><tr><td>Subject passing criteria</td><td>Passing threshold</td><td>Percentage of the final grade</td></tr><tr><td>Lecture - final test</td><td>50.0%</td><td>100.0%</td></tr></table>			Subject passing criteria	Passing threshold	Percentage of the final grade	Lecture - final test	50.0%	100.0%
Subject passing criteria	Passing threshold	Percentage of the final grade							
Lecture - final test	50.0%	100.0%							
Recommended reading	Basic literature	A. Ghatak, K. Thyagarajan: Introduction to fiber optics, Oxford University Press, 1998 M. Ilyas: The Handbook Of Optical Communication Networks, CRC Press, 2003 M. Marciniak: Łączność światłowodowa, WKŁ, 1998							
	Supplementary literature	A. Smoliński: Optoelektronika światłowodowa, WKŁ, 1985 G.P. Agrawal: Fiber-Optic Communications Systems, John Wiley And Sons, 2002 J. Siuzdak: Wstęp do telekomunikacji światłowodowej, WKŁ, 1997
